

# Destinator 9

## Quick Start Guide

### (Prepaid License for LG GM730 Smartphone)

V0.8

August 13, 2009

## Welcome to Destinator 9

We are delighted that you have chosen **Destinator 9**! This QuickStartGuide tells you how to install the navigation software, activate the included map, and use Destinator for your safe and reliable navigation.

## Installation from SD Card

### Important:

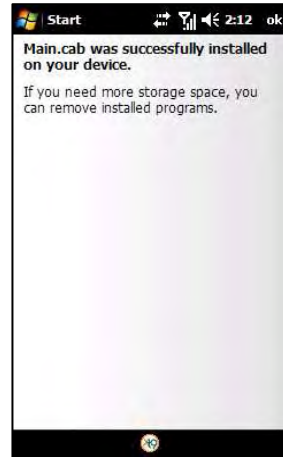

- If your phone contains a previously installed Destinator version, uninstall the old Destinator version by selecting **Start > Settings > Remove Programs** before inserting the SD card into the card slot.
- Before starting the Destinator 9 installation, it is recommended that you backup any data stored on the SD card that you wish to preserve onto your PC in case the SD card is somehow damaged during usage or the data is deleted by mistake.
- After Destinator 9 is successfully installed, the map would be stored in the **\Storage Card\LG\_GM730\Destinator\Maps** folder on the SD card. *Do not delete or move any files in this folder.*
- If for some reason the automatic installation or re-installation is not completed successfully after you insert the SD card into your phone, please consult the user documentation provided to you with your LG phone. You may also display Destinator installation files on the SD card by using File Explorer which are located in the following directory or path: **\Storage Card\LG\_GM730\Destinator**. Click on **Main.cab** to manually initiate the installation process of Destinator 9.

Follow the instructions below to automatically install Destinator 9 onto your LG GM730 phone:

1. Make sure that your phone has sufficient storage space (> 50 MB) and battery power.
2. Switch off your LG phone and insert the SD card shipped with your LG phone into the SD slot by following the instructions provided with your phone. Turn your phone on and Destinator should install automatically. Please read the *Important* notice above if you encounter any difficulties during the installation of Destinator.

3. When the “**Main.cab was successfully installed on your device**” message appears, tap **OK** at the upper right corner of the screen to complete the installation.

4. To start Destinator 9, select **Start > Programs** and tap the  icon.

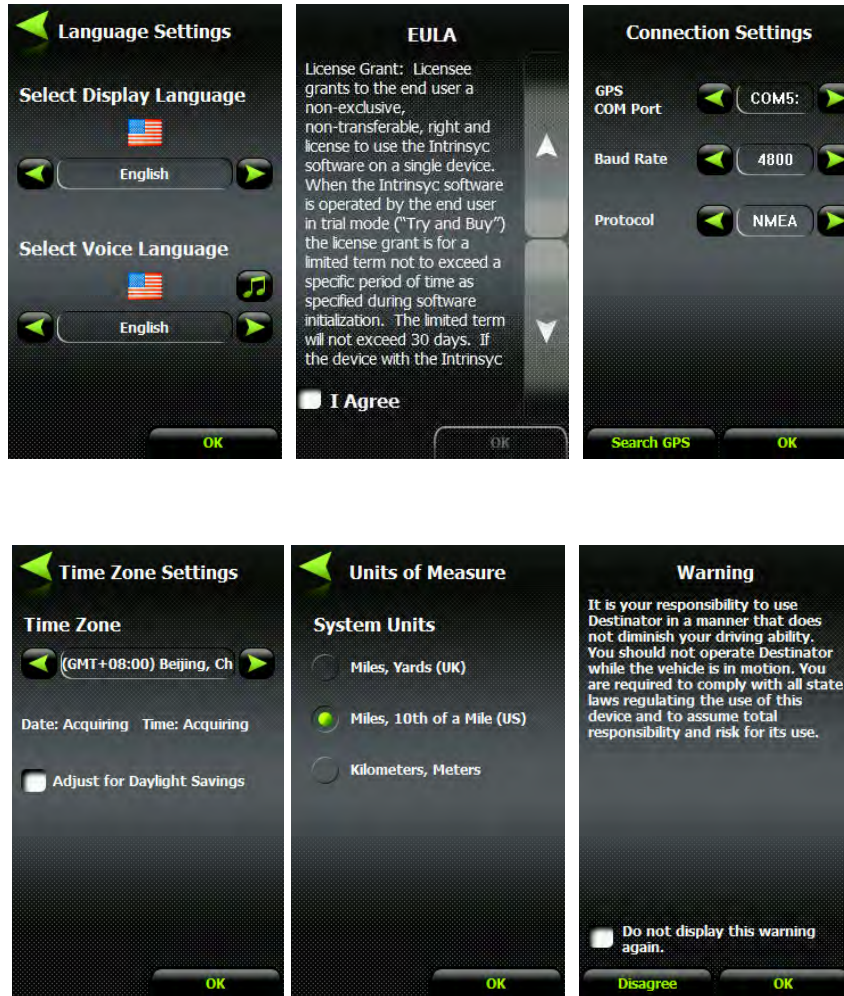

## First Time Start Up Wizard

After the installation is completed and Destinator 9 application is run for the first time, the Start Up Wizard is invoked. The Start Up Wizard enables you to quickly configure Destinator so you may start navigating right away.

The Wizard will display the following configuration screens. Please select the settings as appropriate for your region, and review and agree to the End User License Agreement (EULA).

Once these steps have been completed, the Destinator application will launch.

## Map Activation

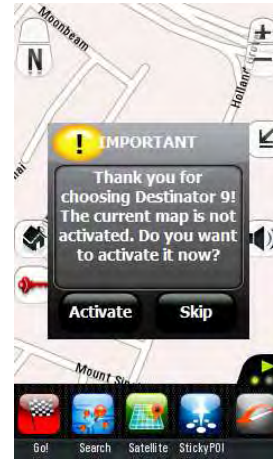

The Destinator 9 application provided with your LG smartphone includes a regional map that requires activation before full Turn-By-Turn navigation functionality can be utilized.

Please follow the step-by-step instructions below to activate the included map:

## Automatic Activation

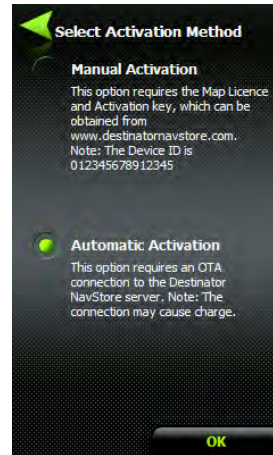

1. The Destinator Application and regional Map included with your LG smartphone requires a quick one-time activation to obtain full functionality of Destinator 9.

Select **Activate** to start the activation process when Destinator 9 displays **"The current map is not activated. Do you want to activate it now?"**

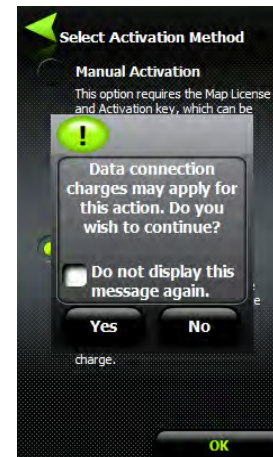

2. The **Select Activation Method** screen provides two options: **Manual Activation** and **Automatic Activation**.

Select **Automatic Activation** and tap **OK** to quickly activate the regional map.

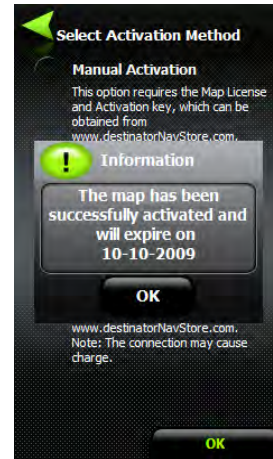

3. Destinator 9 displays a dialog box informing you that a data connection is required to send the device information to the activation server.

Tap **Yes** to proceed.

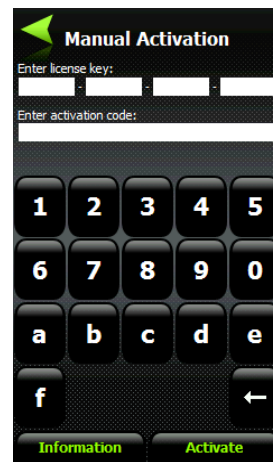

4. A small data packet is sent to the Destinator NavStore to validate your license. Upon successful validation of your Destinator installation, the application will inform you that map has been successfully activated.

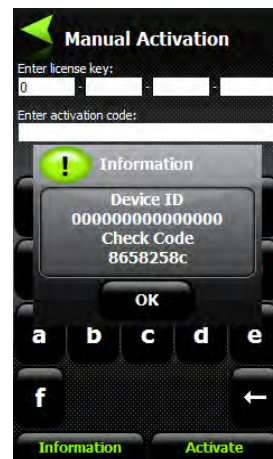

## Manual Activation

1. If you are in an area of poor cellular coverage or do not have a data connection, you may wish to use the optional **Manual Activation** process. Select "**Manual Activation**" from the **Select Activation Method** screen. You will be asked to manually enter your license key and activation code.

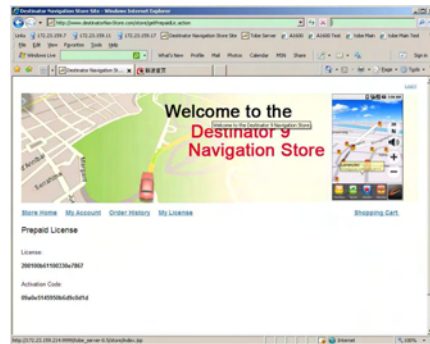

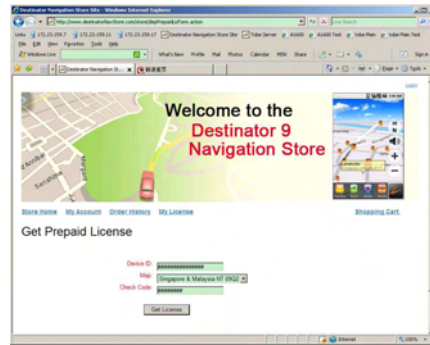

2. Tap the **Information** button to display your device ID and check code that will be used to get your license key and activation code.

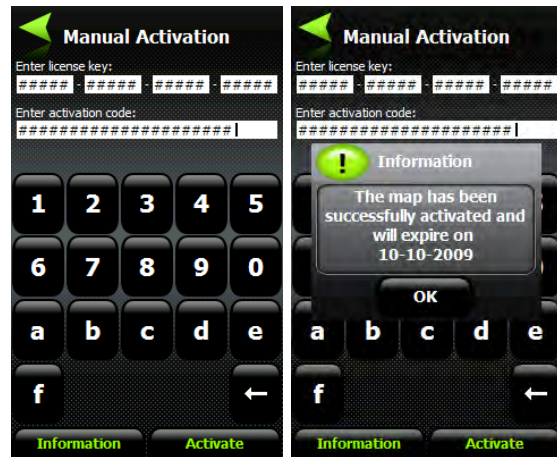

3. From your PC's Web browser, visit the Destinator NavStore at [www.destinatornavstore.com](http://www.destinatornavstore.com) and click the **Prepaid License Page** link.

4. Type in your device ID and check code, and click **Get License** to display your license key and activation code.

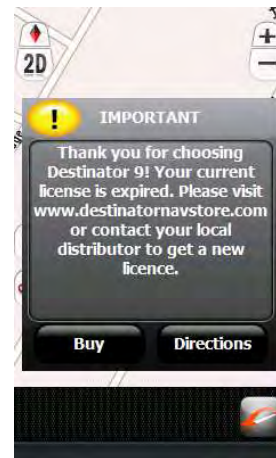

5. On your phone, type in the license key and activation code and tap **Activate** to activate the map.  
Upon successful validation of your Destinator installation, the application will inform you that map has been successfully activated.

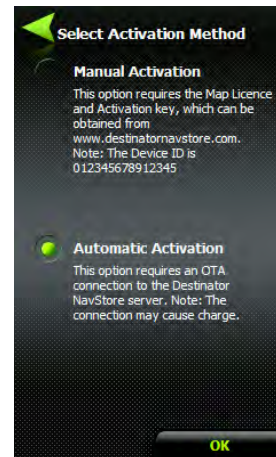

## Reactivation

1. Once the licensed period has expired, the Destinator application will display the following prompt, '**Your current map license is expired, please visit [www.destinatornavstore.com](http://www.destinatornavstore.com) or contact your local distributor to get a new license!**'  
If you have registered and purchased your new map license at [www.destinatornavstore.com](http://www.destinatornavstore.com) then select **Buy** to renew your map license. Otherwise visit [www.destinatornavstore.com](http://www.destinatornavstore.com) to register and purchase your new map license.

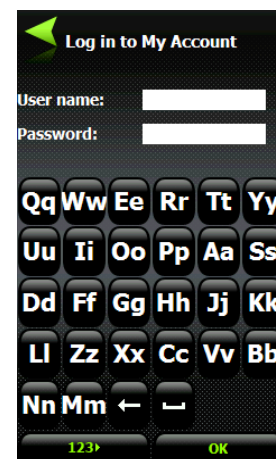

2. From the **Select Activation Method** screen, select **Automatic Activation**.

For the manual activation steps, refer to the **Manual Activation** section above.

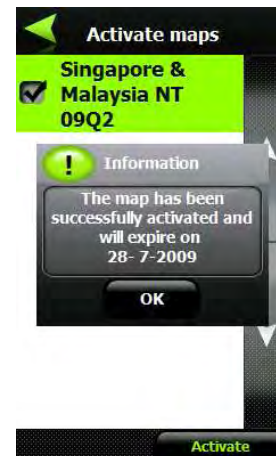

3. Type in your Destinator NavStore login information and tap **OK**.

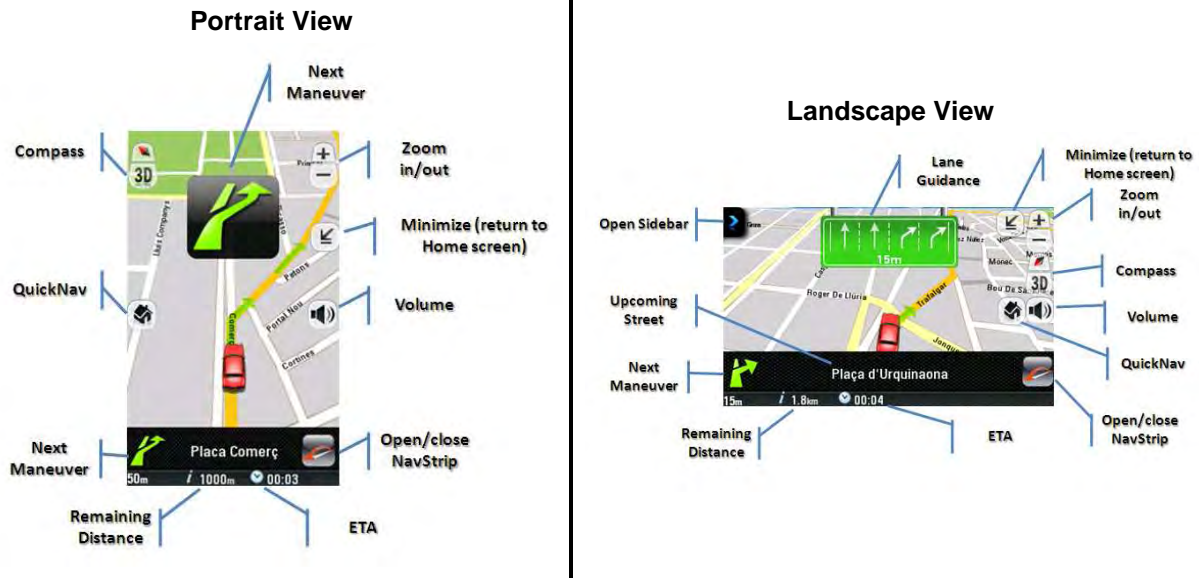

4. After validation of your account status and license information, Destinator 9 will display the maps of which licenses are available on the Destinator NavStore.

Select a map and tap **Activate**. Destinator 9 will inform you that the map has been successfully activated.

## Map View Controls

You can use the icons displayed on this screen to plan and view your route:

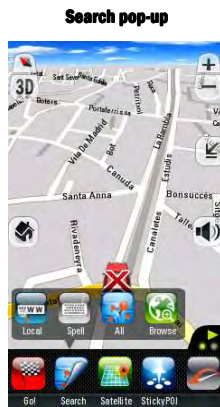

## Introduction to the NavStrip™

Destinator's exclusive NavStrip is a new and easy method for accessing all functions with a quick touch. Open/close the NavStrip with a quick tap on the Destinator logo.

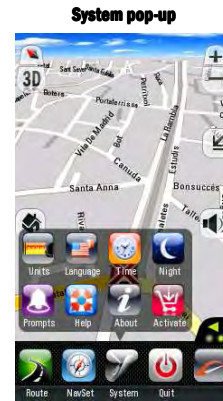

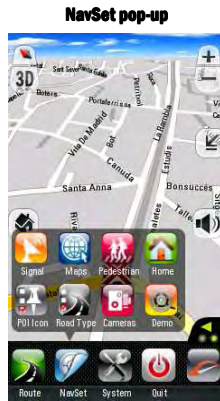

### Navigating Using The NavStrip

1. Tap the Destinator logo in the lower right hand corner of the screen to open the NavStrip
2. Tap **Go** button.
3. Tap **Address** button and define your destination:
  - Tap **Change** (if required)
  - Select state or country
  - Tap **City First**
  - Type in City, Street, and Address number
4. Tap **Go** button.
5. Destinator will guide you on screen and by voice.

## Finding POI With The NavStrip

1. Tap **Search** button.
2. Tap **Spell** button.
3. Choose a search option
4. Spell out the POI name or a partial keyword.
5. Tap **Show On Map**.
6. Tap **OK** to choose a result.
7. Tap **Go** button.
8. Destinator will guide you on screen and by voice.

Note: Google Satellite view is an optional feature and is subject to Google Maps API Licensing Terms and Conditions.

## Sidebar

Available in Landscape mode, Destinator's Sidebar provides additional useful information as you drive. The Sidebar can open and close automatically or conveniently be 'pinned' to the screen.

1. Trip Data Tab

2. Upcoming Maneuvers Tab

## Customizing Your Experience

### QuickNav – One Touch Destination

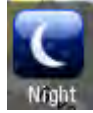

From **Map**, tap the **QuickNav** button and select a destination address. Tap **OK** to start navigation to the QuickNav location.

### Tap N Go

Tap anywhere on the **Map** to navigate there or to store the location to navigate there later.

### Night/Day View

From **System** pop-up, tap day/night button to display night or day view.

### 2D/3D View

From **Map**, tap **2D** or **3D** map compass button to display 2D or 3D map.

### Turn-by-Turn Directions

From **Map**, tap the **Next Turn** Dashboard to display a complete turn-by-turn list of directions.

### Speed Warning

Destinator lets you know when you are exceeding the speed limit. To turn it on, tap **Prompts** from the **System** pop-up.

## Registration

It is recommended that you register the product. Registration enables you to take advantage of technical support and upgrade options at

[Click here](#) to register/activate your product.

New users can set up an account to activate a product or access downloads. A license is not required to set up an account.

## Support:

Please visit Intrinsyc's Destinator NavStore at [www.destinatornavstore.com](http://www.destinatornavstore.com) to view available support downloads and updates.
