INTRINSYC TECHNOLOGIES CORPORATION

QUARTERLY REPORT

SECOND QUARTER FISCAL 2019

For the Three and Six Months ended June 30, 2019 and 2018

Chief Executive Officer Letter

Dear Fellow Shareholder:

Intrinsyc reported revenue of US $5.5 million (CDN $7.3 million), with EBITDA of US $169,429 (CDN $226,644). Revenue was down 11% from the previous quarter and 15% over the same period in the prior year. Although revenue was lower in the quarter, the Company had several achievements in the areas of design wins, new product introductions, and expense reduction.

We achieved our most productive quarter ever with 9 new design wins. These wins include 5 companies that are currently developing intelligent IoT products that will be powered by the Company's edge AI computing modules and 4 new clients that have begun commercial shipments of their products. Intelligent IoT products under development include a variety of next-generation intelligent IoT products, including robotics, drones, medical devices, video conferencing, intelligent cameras, and more. We expect to achieve multi-year recurring revenue from our growing list of production clients as they purchase Intrinsyc's edge AI computing modules to power their intelligent IoT products.

The prolific introduction of new products in the quarter was another bright spot. We had our most productive quarter of new product introductions with the launch of four new Edge AI computing platforms including:

- Snapdragon™ 855 Mobile Hardware Development Kit ("HDK")
- Open-Q™ 212A system on module ("SOM") and Home Hub Development Kit
- Open-Q™ 820Pro µSOM (micro System on Module) and Development Kit
- Snapdragon 8155 Automotive Development Platform ("ADP")

In April, we introduced the Snapdragon™ 855 HDK. The 855 HDK is designed to support the ecosystem of technology companies and application providers looking to utilize the advanced features of the Snapdragon 855. This is Qualcomm's latest generation technology and pushes the boundaries of computing and power performance; with innovations in immersive multimedia, artificial intelligence, and security.

We announced the Open-Q™ 212A SOM and Development Kit in May. The Open-Q™ 212A SOM is a compact (50mm x 46.5mm) pre-certified, production-ready embedded computing module that is ideal for cost-sensitive home hub, home automation, and smart audio devices featuring voice control, AI, and wireless connectivity. It is powered by the Qualcomm® Home Hub 300 Platform based on the Qualcomm® APQ8009 System-on-Chip ("SoC").

Intrinsyc launched the Open-Q™ 820Pro µSOM (micro System on Module); an enhanced power-performance version of our popular 820 µSOM, with increased processing power, more memory, and long-life availability, in the same ultra-compact 25×50 mm form factor. The production ready, pre-certified 820Pro µSOM is a pin compatible, drop-in replacement for the existing 820 µSOM, requiring only SW changes to provide higher performance, with more efficiency, and long-term availability.

The Company also began shipping the Snapdragon™ Automotive Development Platform ("ADP") based on the Qualcomm® Snapdragon™ SA8155P processor from Qualcomm® Technologies, Inc. ("QTI"). The platform provides OEMs and ecosystem partners with access to QTI's high-performance automotive infotainment and advanced driver assist platform, for developing, testing, optimizing and showcasing next-generation in-vehicle infotainment solutions. The ADP provides an optimized application development environment for rapid deployment of high performance and power efficient connected automotive infotainment offerings.

These products are a catalyst for both product development services as well as future recurring revenue from computing modules.

Select highlights from the second quarter 2019 are as follows:

Quarterly Business Events

- From April 30 – May 1, 2019, the Company's CEO and CFO presented and participated in one-on-one meetings at the Planet MicroCap Showcase 2019 in Las Vegas, Nevada.
- Announced the receipt of orders that are in aggregate valued at US$921,011. Orders for the Company's Open-Q™ embedded computing modules are valued at US$411,200 and include an initial stocking order for a new client. The Company also received orders from existing and new clients for product development services valued at US$509,811. Products and services ordered are expected to be delivered over the next four months.
- On July 3, the Company announced the receipt of orders in the last week of June, valued at US$818,161. Orders for the Company's Open-Q™ embedded computing modules are valued at US$384,240 and include an initial stocking order for a new production client building medical devices. The Company also received orders from existing and new clients for product development services valued in aggregate at US$433,936.
- Announced the resignation of the Company's Vice President, Global Sales. Intrinsyc's CEO, Tracy Rees, is managing the sales organization until a replacement is hired.
- Introduced the following new edge AI computing platforms:
    - Snapdragon™ 855 Mobile Hardware Development Kit, a new mobile hardware development kit ("HDK")
    - Open-Q™ 212A system on module ("SOM") and Home Hub Development Kit
    - Open-Q™ 820Pro µSOM (micro System on Module) and Development Kit
    - Snapdragon 8155 Automotive Development Platform ("ADP")
- Increased design wins of companies developing their products or shipping commercial devices using the Company's computing modules, from 62 to 71. Clients shipping products powered by Intrinsyc's edge AI computing modules increased from 24 to 28, with 43 companies currently in development.

Financial Highlights

Three Month Comparative Results

The Company reported second quarter revenue of US $5.5 million (CDN $7.3 million), down 11% over the prior period of US $6.1 million (CDN $8.2 million) and 15% over the same period in the prior year of US $6.4 million (CDN $8.3 million).

Gross margin for the three and six months ended June 30, 2019 was 34%, which was consistent with the gross margin in the same period in the prior year and higher than 32% in the previous three months. EBITDA was as follows:

	Three months ended June 30, 2019		**Three months ended March 31, 2019**		**Three months ended June 30, 2018 (Restated)**	
	US$	**CDN$**	**US$**	**CDN$**	**US$**	**CDN$**
Operating income (loss)	($47,412)	($63,423)	($32,178)	($42,780)	$268,263	$346,356
Add back: Other operating expenses	216,841	290,067	187,737	249,597	223,129	288,082
EBITDA	**$169,429**	**$226,644**	**$155,559**	**$206,817**	**$491,392**	**$634,438**

The Company had net income of US $66,247 (CDN $83,378), and earnings per share of US $0.00 (CDN $0.00) compared to net loss of US $171,855 (CDN $225,414), or US $0.01 (CDN $0.01) loss per share in the prior quarter

and net income of US $108,989 (CDN $142,108) or US $0,01 (CDN $0.01) earnings per share in the same period in the prior year.

Six Month Comparative Results

The Company reported revenue of US $11.6 million (CDN $15.4 million), down 7% over the same period in the prior year of US$12.5 million (CDN$16.0 million). The increase in revenue over the comparative periods was due primarily to increased revenue from the sale of hardware products.

Gross margin for the six months ended June 30, 2019 was 33%, which was consistent with the gross margin in the same period in the prior year. EBITDA was as follows:

	Six months ended June 30. 2019		**Six months ended June 30, 2018 (Restated)**	
	US$	**CDN$**	**US$**	**CDN$**
Operating income (loss)	($ 79,590)	($ 106,203)	$ 421,266	$ 539,859
Add: revenue recognized as interest income as per IFRS	-	-	-	-
Add back: Other operating expenses	404,578	539,664	419,920	536,965
EBITDA	**$ 324,988**	**$ 433,461**	**$ 841,186**	**$ 1,076,822**

The Company had a net loss of US $105,608 (CDN $138,213) or US $0.00 (CDN $0.00) loss per share during the six months ended June 30, 2019, compared to net income of US $268,555 (CDN $340,575) or US $0.01 (CDN $0.01) during the same period in the prior year.

Financial Position as at June 30, 2019

Working capital as of June 30, 2019 was US $10.0 million (CDN $13.1 million) inclusive of cash and short-term investments of US $3.8 million (CDN $5.0 million). This is compared to net working capital of US $10.3 million (CDN $14.1 million) as at December 31, 2018 inclusive of cash and short-term investments of US $6.0 million (CDN $8.1 million).

Looking Forward

In early August we signed a supply agreement and received an initial order in the amount of $1.2M for the Company's Open-Q™ 835 edge AI computing modules. We expect to deliver these modules in the fourth quarter, 2019.

Although the company is consistently achieving positive EBITDA, we are taking steps to improve our financial performance, and made additional reduction in our operating expenses in the second quarter. Since March 2019, we have made operating expense reductions with an annualized cost savings of over US$1,000,000, with full impact of these savings beginning in the third quarter. With these cost savings and new orders received in the latter half of the second quarter and beginning in the third quarter, we expect to have particularly strong fourth quarter financial results.

Intrinsyc continues to take Internet of Things products to the next level - building artificial intelligence or advanced analytics directly into the devices and systems where insights are needed in real-time. We are currently developing new products and expect to launch additional Automotive Development Platforms and Edge AI System on Module ("SOM") and development kit based on Premium-Tier Snapdragon technology over the next few months. These products will join our broad portfolio of Edge AI computing modules, with high-performance multi-core processors and integrated artificial intelligence, to power intelligent IoT solutions such as; autonomous vehicles, intelligent cameras, smart home hubs, smart cities, robotics, and industry 4.0 applications, and more.

I appreciate your support as we continue to execute on our growth strategy and focus on delivering long-term value for shareholders.

Yours sincerely,

“Tracy Rees”

President and Chief Executive Officer

1. REPORTING ENTITY

Intrinsyc Technologies Corporation (formerly Intrinsyc Software International, Inc.) ("Intrinsyc" or the "Company") is a public company domiciled in Canada and incorporated on August 31, 1992 under the laws of Alberta and continued under the Company Act (British Columbia) on July 19, 1995. Articles of Continuance were filed under the Canada Business Corporations Act on May 1, 2003 to continue the Company federally and change the name of the Company from Intrinsyc Software, Inc. to Intrinsyc Software International, Inc. Articles of Amendment were filed under the Canada Business Corporations Act on June 17, 2014 to change the name of the Company to Intrinsyc Technologies Corporation. The Company's principal business office is Suite 300, 885 Dunsmuir Street, Vancouver, British Columbia, V6C 1N5 and its registered office is Suite 1700, 1055 West Hastings Street, Vancouver, British Columbia, V6E 2E9.

The Company is an Internet of Things ("IoT") product development company, offering hardware development kits, computing modules, proprietary software products, and engineering design and development services. These solutions are focused on the fast growing high-performance IoT product market; including; augmented and virtual reality, drones, robotics, digital signage, automotive, IP cameras, medical systems, wearable technology, and many others. The Company provides value by enabling device makers and technology suppliers to deliver compelling, next generation mobile and embedded wireless devices with faster time to market, higher quality, and differentiating innovation.

The interim condensed consolidated financial statements of the Company, as at, and for the three and six months ended June 30, 2019 and June 30, 2018 comprise the Company and its subsidiaries (together referred to as the "Company" and individually as "Company entities").

2. BASIS OF PRESENTATION

Statement of Compliance

These interim condensed consolidated financial statements, which have been approved by the Board of Directors on August 12, 2019, have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). These interim condensed consolidated financial statements have been prepared using the historical cost basis and the same accounting policies as those disclosed in the Company's annual financial statements as at and for the year ended December 31, 2018 (except for the adoption of new accounting standards effective January 1, 2019 – see below). Accordingly, these interim condensed consolidated financial statements do not include all disclosures required for annual financial statements and should be read in conjunction with the Company's annual financial statements as at and for the year ended December 31, 2018 (which were prepared in accordance with International Financial Reporting Standards, or "IFRS").

3. SIGNIFICANT ACCOUNTING POLICIES

New Standards and Interpretations Adopted

The Company applied, for the first time, IFRS 16 - *Leases* which require restatement of previous financial statements. The nature and effect of these changes are disclosed below.

IFRS 16 - Leases

The standard supersedes the current IAS 17, Leases (IAS 17) standard. IFRS 16 introduces a single accounting model for lessees and for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee will be required to recognize a right-of-use asset, representing its right to use the underlying asset, and a lease liability, representing its obligation to make lease payments.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The Company applied IFRS 16 with a date of initial application of January 1, 2019. As a result, the Company has changed its accounting policy for lease contracts as detailed below.

The Company applied IFRS 16 using the full retrospective approach. Consequently, it has restated the comparative information and a third statement of financial position as at the beginning of the earliest comparative period is presented. As a result of adopting IFRS 16, the Company has recognized a significant increase to both assets and liabilities on the Consolidated Statements of Financial Position, as well as a decrease to operating costs (for the removal of rent expense for leases), an increase to depreciation (due to depreciation of the right-of-use asset), and an increase to finance costs (due to accretion of the lease liability). The details of the changes in accounting policies are disclosed below.

Definition of a Lease

Previously, the Company determined at contract inception whether an arrangement is or contains a lease under IFRIC 4. Under IFRS 16, the Company assesses whether a contract is or contains a lease based on the definition of a lease. Under IFRIC 4, the Company assessed a lease based on the assessment of whether:

- fulfilment of the arrangement was dependent on the use of a specific asset or assets; and
- the arrangement had conveyed a right to use the asset. An arrangement conveyed the right to use the asset if one of the following was met:
- the purchaser had the ability or right to operate the asset while obtaining or controlling more than an insignificant amount of the output;
- the purchaser had the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output; or
- facts and circumstances indicated that it was remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal to the current market price per unit of output.

On transition to IFRS 16, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Company applied the definition of a lease under IFRS 16 to contracts entered into or changed on or after January 1, 2019.

As a Lessee

As a lessee, the Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Company. Under IFRS 16, the Company recognizes right-of-use assets and lease liabilities for most leases.

The Company decided to apply recognition exemptions to short-term leases of office space in Taiwan and India.

The cumulative impact on amounts recognized in the Company's interim condensed consolidated statements of financial position as at January 1, and December 31, 2018, is shown below:

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Interim Condensed Consolidated Statement of Financial Position	January 1, 2018– As reported prior to IFRS 16 transition	Adjustments	January 1, 2018 – As restated after IFRS 16 transition

Unrealized foreign exchange	($ 15,748)	($ 77,591)	($ 93,339)
Trade and other payables	($ 949,767)	$ 5,327	($ 944,440)
Lease payments	$ -	($ 84,560)	($ 84,560)

Prior to adopting IFRS 16, the total minimum operating lease commitments as at December 31, 2018 were $1,320,328. The weighted average discount rate applied to the total lease liabilities recognized on transition was 3.00%. The difference between the total of the minimum lease payments set out in Note 12(a) to the Company's 2018 Annual Financial Statements and the total lease liabilities recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at December 31, 2018; partially offset by
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts but which do not qualify to be accounted for as a lease liability

Right-of-use assets and lease liabilities

The Company has recorded a right-of-use asset and a lease liability for all existing leases at the lease commencement date, which is January 1, 2018 for the purposes of the Company's adoption. The lease liability has been initially measured at the present value of all lease payments that remain to be paid at the commencement date. Lease payments included in the measurement of the lease liability only include fixed payments.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

After transition, the right-of-use asset will initially be measured at cost, consisting of:

- the initial amount of the lease liability, adjusted for any lease payments made at or before the commencement date; plus
- any initial direct costs incurred; and
- an estimate of costs to dismantle and remove the underlying asset or restore the site on which it is located; less
- any lease incentives received.

The right-of-use asset will typically be depreciated on a straight-line basis over the lease term, unless the Company expects to obtain ownership of the leased asset at the end of the lease. The lease term will consist of:

- the non-cancellable period of the lease;
- periods covered by options to extend the lease, where we are reasonably certain to exercise the option; and
- periods covered by options to terminate the lease, where we are reasonably certain not to exercise the option.

4. TRADE AND OTHER RECEIVABLES

	June 30, 2019	December 31, 2018	January 1, 2018
Trade and other receivables	$ 2,067,921	$ 4,980,813	$ 4,640,131
Less: Allowance for doubtful accounts	-	-	(128,197)
Unbilled revenue	676,657	284,263	287,691
	$ 2,744,578	**$ 5,265,076**	**$ 4,799,625**

Included in trade and other receivables balance as at January 1, 2018 was an amount of $60,000 which was payable by a customer that had not been fully insured with Export Development Canada ("EDC" – see Note 14) by the Company. An allowance for the full amount had been taken and was included in Allowance for Doubtful Accounts as at January 1, 2018. During 2018, the Company only received only one (1) of the agreed upon payments reduced Trade and Other Receivables and Allowance for Doubtful Accounts by $45,000 as the customer went out of business.

At June 30, 2019, unbilled revenue on open contracts accounted for using the percentage of completion method amounted to $676,657 (December 31, 2018 - $284,263; January 1, 2018 - $287,691). In addition, the remaining contractual amounts on fixed price contracts were $816,884 as at June 30, 2019 (December 31, 2018 - $1,991,051; January 1, 2018 - $1,599,799). The Company will recognize this revenue as the contracts are completed, which is expected to occur over the next 8-12 months.

5. INVESTMENT IN CUSTOMER

On October 1, 2014, the Company announced that it invested in Stream TV Networks, Inc. ("Stream TV"), a current customer of Intrinsyc, an amount of $1,500,000 in the form of a subordinated, secured convertible promissory note bearing interest at three percent (3%) per annum with a maturity date of December 31, 2015 (the "Note"). Interest is

5. INVESTMENT IN CUSTOMER (continued)

payable on the earlier of (i) December 31, 2015 or (ii) when converted to Stream TV shares. Stream TV committed to acquire a minimum of $3,000,000 in Intrinsyc products and services over the next twelve months.

The Note was initially convertible into the securities of Stream TV, at the sole option of Stream TV, subject to the execution of an equity financing of a minimum of $15 million by Stream TV (the "Qualified Financing"). The Note was convertible into the class of securities sold in the Qualifying Financing at the share price issued in the Qualifying Financing.

The Company had determined that a reasonable market interest rate for a loan with the features of the Stream TV convertible loan and for pre-commercial entities in the emerging technology sector would be 12%. The Company recognized the difference as a deferred discount.

On December 10, 2015, the Company announced that the arrangements were amended to increase the purchase commitment by Stream TV to $4,500,000 in Intrinsyc product, services and royalties to be generated on or before March 31, 2016, which Stream TV met. In addition, the subordinated, secured convertible promissory note was amended to remove the conversion feature and to extend the maturity date from December 31, 2015 to June 30, 2016.

On June 28, 2016, the Company announced that the arrangements were further amended, to increase the purchase commitment to $6,000,000 in Intrinsyc products, services and royalties to be generated on or before December 30, 2016, which Stream TV has met. In addition, the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from June 30, 2016 to December 30, 2016.

On December 29, 2016, the Company announced that the subordinated, secured promissory note, with a principal amount of $1.5 million, has been further amended to extend the maturity date from December 30, 2016 to March 30, 2017. In consideration for the extension Intrinsyc received 30,000 warrants convertible into Class A common shares in Stream TV. at a strike price of $5 per share, on a 1 for 1 basis for a period of up to 5 years. The warrants may only be exercised if Stream TV becomes subject to a liquidity event defined in the warrant agreement as liquidation, dissolution, or winding up of Stream TV, whether voluntary or involuntary, or an Initial Public Offering ("IPO") or sale of the Stream TV by either stock or assets that is at least a change of control transaction. To date, none of these warrants have been exercised.

On February 2, 2017, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from March 30, 2017 to February 1, 2018. In consideration for the extension Intrinsyc received 120,000 warrants convertible into Class A common shares in Stream TV at a strike price of $5, on a 1 for 1 basis for a period of up to 5 years. The exercise of these warrants is also subject to the same terms as the warrants received December 29, 2016. To date, none of these warrants have been exercised. In addition, Stream TV committed to acquire a minimum of $2,000,000 in Intrinsyc products, services, and royalties to be purchased or generated between February 1, 2017 and February 1, 2018 (which Stream TV has only committed to approximately $700,000).

On February 1, 2018, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from February 1, 2018 to April 2, 2018.

On April 2, 2018, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, had been further amended to extend the maturity date from April 2, 2018 to May 2, 2018.

On May 2, 2018, the Company announced that it made a strategic equity investment in Stream TV Networks through the conversion of the subordinated, secured promissory note and interest accrued for a total amount of $1,661,384 into 415,346 common shares (which is less than 1% ownership in Stream TV). The amount was reclassified as Investment in Customer. In addition, the parties also signed an amendment to the Master Services Agreement in which Stream TV

5. INVESTMENT IN CUSTOMER (continued)

agrees to provide a commitment of $1,500,000 in services to be purchased directly or through connected party referrals during the eighteen (18) month period beginning May 1, 2018.

The Company revalued the investment as at December 31, 2018, with the decline in the fair value being recorded as Interest and Other Expenses (Income) in the Company's Statements of Operations for the year ended December 31, 2018. In the event that Stream TV does not raise a minimum of $25 million within the two-year period subsequent to the Equity Investment conversion date of May 2, 2018, the Equity Investment will revert back to become a Note Payable to Intrinsyc. In the event that Stream TV raises a minimum of $25 million within the two year period subsequent to the Equity Investment conversion date of May 2, 2018 at a lower valuation than the conversion of the Note into the Equity Investment by Intrinsyc on May 2, 2018 and Stream TV's two primary debtors also convert their loans into equity at this time, Stream TV will issue additional shares to Intrinsyc based upon lower valuation of the equity valuation completed by Stream TV.

The Company fair valued the Warrants using a modified Black Scholes calculation with the fair value on the date of inception being $30,000 as at December 31, 2018 and $153,000 as at December 31, 2017. The value of the Warrants was included in the Investment in Customer (formerly Loan to Customer) on the Statement of Financial Position with the decline in the fair value being recorded as Interest and Other Expenses (Income) on the Company's Statements of Operations for the year ended December 31, 2018.

The Company has assessed the investment for impairment at the end of the current reporting period and concluded that no loss event has occurred since the conversion of the Note to an equity investment in Stream TV. However, the Company acknowledges that there is uncertainty regarding the valuation of the equity investment due to the uncertainty inherent to the fact that Stream TV is a pre-commercial entity in an emerging technology sector. Further, the Company assessed that there was no revaluation of the investment and Warrants as at June 30, 2019.

6. INVENTORY

	June 30, 2019	**December 31, 2018**	**January 1, 2018**
Parts	$ 3,766,120	$ 1,955,270	$ 2,436,372
Finished goods	3,137,206	2,676,117	1,820,655
	$ 6,903,326	**$ 4,631,387**	**$ 4,257,027**

During the three and six months ended June 30, 2019, the Company charged $2,731,117 and $5,849,659 (three and six months ended June 30, 2018: $3,254,433 and $6,363,664) of inventory related amounts to cost of sales.

7. EQUIPMENT

The following table presents details of movement in the carrying value of equipment by type:

Cost

	Computers and Equipment	Furniture and Fixtures	Leasehold Improvements	Total
Balance, January 1, 2018	**$ 1,923,381**	**$ 923,213**	**$ 911,182**	**$ 3,757,776**

Balance, June 30, 2019	**($ 1,859,409)**	**($ 893,823)**	**($ 789,184)**	**($ 3,542,416)**

Net Book Value

	Computers and Equipment	Furniture and Fixtures	Leasehold Improvements	Total
Balance, January 1, 2018 (Restated – see Note 3)	$ 130,453	$ 88,253	$ 143,994	**$ 362,700**
Balance, December 31, 2018 (Restated – see Note 3)	$ 126,957	$ 151,399	$ 129,350	**$ 407,706**
Balance, June 30, 2019	$ 116,646	$ 133,792	$ 204,110	**$ 454,548**

8. INTANGIBLE ASSETS

The following table presents details of movement in the carrying value of the intangible assets which only consists of acquired software technology:

	June 30, 2019	December 31, 2018	January 1, 2018
Beginning Balance	**$ 241,288**	**$ 118,591**	**$ 111,851**
Purchases	94,526	217,419	87,964
Amortization	(76,763)	(94,722)	(81,224)
Ending Balance	**$ 259,051**	**$ 241,288**	**$118,591**

9. RIGHT-OF-USE ASSET

The following table presents details of movement in the carrying value of the right-of-use asset:

	June 30, 2019	December 31, 2018	January 1, 2018
Beginning Balance	**$ 1,247,471**	**$ 1,411,647**	**$ 1,575,823**
Purchases	234,961	-	-
Amortization	(106,822)	(164,176)	(164,176)
Ending Balance	**$ 1,375,610**	**$ 1,247,471**	**$ 1,411,647**

Included are $12,305 of decommissioning costs which have been capitalized and accrued for. This obligation represents the cost the Company would incur to restore the leased office space in Taiwan to its original condition.

10. LINE OF CREDIT

On March 6, 2018, the Company entered into a line of credit agreement with its bank for up to CDN$4.4 million. The line bears interest at chartered bank's prime lending rate +1.11% with no standby charge and does not include any covenants for the Company. Borrowings under this facility must not exceed the aggregate of the following, less Potential Prior-Ranking Claims:

a) 75% of Eligible Canadian/US Accounts Receivable;
b) 90% of Eligible EDC Accounts Receivable;
c) 65% of Eligible Foreign Accounts Receivable; and
d) to a maximum of $750,000.00, 50% of the lesser of cost or net realizable value of Unencumbered Inventory.

As of June 30, 2019, outstanding borrowings were CDN $nil. Subsequent to June 30, 2019, the line of credit agreement was amended whereby the borrowing limit increased to CDN$4.7 million.

11. SHARE CAPITAL

Authorized

Unlimited number of preference shares without par value; and
Unlimited number of common shares without par value.

11. SHARE CAPITAL (continued)

Outstanding, June 30, 2019	**20,020,546**	**$107,051,067**

[c] Stock options

The Company has a rolling incentive stock option plan. Under the terms of the Company's stock option plan, the Board of Directors may grant options to directors, officers, employees, consultants and service providers equal to the lower of: (i) up to 10% of issued and outstanding common shares of the Company from time to time less one share; and, (ii) 3,750,000 common shares. The plan provides for the granting of options at the closing price of the Company's stock on the day prior to the grant date. Options granted generally vest over three years with the first one-third vesting at the first anniversary date of the grant and the balance vesting in equal amounts at the end of each quarter thereafter. There are no cash settlement alternatives. The Company does not have a past practice of cash settlement for these share options.

The Company determines the term of each option at the time it is granted, with options generally having a five-year term. As of June 30, 2019, the Company was entitled to grant 2,002,053 incentive stock options under the plan of which 1,454,344 have been granted.

A summary of the Company's share option activity for the six months ended June 30, 2019 is as follows:

11. SHARE CAPITAL (continued)

	Outstanding options	
	Number of options	**Weighted average exercise price (in Canadian dollars)**
Outstanding, January 1, 2018	**1,317,229**	**$ 1.22**
Options granted	458,950	1.36
Options exercised	(195,088)	0.59
Options forfeited	(57,775)	1.80
Outstanding, December 31, 2018	**1,523,316**	**$ 1.32**
Options granted	214,000	1.50
Options exercised	(223,470)	0.81
Options forfeited	(53,877)	1.52
Expired	(5,625)	0.80
Outstanding, June 30, 2019	**1,454,344**	**$ 1.42**

The following table summarizes the share options outstanding as at June 30, 2019:

Options outstanding				Options exercisable	
Range of exercise price (in Canadian dollars)	**# of common shares**	**Weighted average remaining contractual life**	**Weighted average exercise price (in Canadian dollars)**	**# of options exercisable**	**Weighted average exercise price (in Canadian dollars)**
$ 0.72 - $ 0.88	59,000	0.40	$ 0.82	59,000	$ 0.82
$ 0.89 - $ 0.91	352,837	0.93	$ 0.89	352,837	$ 0.89
$ 0.92 - $ 1.34	381,507	3.56	$ 1.32	214,041	$ 1.31
$ 1.35 - $ 2.29	661,000	3.60	$ 1.81	317,455	$ 2.00
	1,454,344	**2.81**	**$ 1.42**	**943,333**	**$ 1.35**

The weighted average fair value of stock options granted during the three and six months ended June 30, 2019 was CDN $0.58 and CDN $0.69 per share (three and six months ended June 30, 2018 – CDN $0.72 and CDN $0.71 per share).

The total stock-based compensation related to stock options for the three and six months ended June 30, 2019 was $55,857 and $104,953 (three and six months ended June 30, 2018 - $87,733 and $150,287 respectively

The fair value of each option granted was estimated on the date of grant using the Black-Scholes Option Pricing Model with the following weighted average assumptions:

	Three months ended June 30, 2019	**Three months ended June 30, 2018**	**Six Months ended June 30, 2019**	**Six Months ended June 30, 2018**
Expected life (in years)	4.3	4.2	3.9	4.0
Risk-free interest rate	1.30%	2.11%	1.58%	1.97%
Volatility	58.21%	69.82%	59.44%	69.82%
Dividend yield	0.00%	0.00%	0.00%	0.00%

11. SHARE CAPITAL (continued)

The expected life of the share options is based on historical data and current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the options is indicative of future trends, which may not necessarily be the actual outcome either.

[d] Restricted Share Units ("RSUs")

The Company adopted a restricted share unit plan (the "RSU Plan") which was approved by its shareholders on May 16, 2017. The aggregate maximum number of shares available for issuance from treasury under the RSU Plan shall not exceed 500,000 shares. The 500,000 RSUs are a separate pool from the Company's incentive stock option plan. The grant-date fair value of the restricted share units equals the fair market value of the corresponding shares at the grant date. The fair value of these equity-settled awards is recognized as compensation expense over the period that related services are rendered with a corresponding increase in equity. The total amount expensed is recognized over the vesting period on a tranche basis, which is the period over which all the specified vesting conditions should be satisfied.

A summary of the Company's RSU activity for the six months ended June 30, 2019 is as follows:

	Number of RSUs
Outstanding, January 1, 2018	**219,000**
RSUs granted	-
RSUs exercised	-
RSUs forfeited	-
Outstanding, December 31, 2018	**219,000**
RSUs granted	97,895
RSUs exercised	-
RSUs forfeited	-
Outstanding, June 30, 2019	**316,895**

The outstanding RSUs vest over three years as to one third on each anniversary of the grant date. Compensation for the three months and six months ended June 30, 2019 was $37,710 and $64,704 ($47,525 and $99,229 for the three and six months ended June 30, 2018). As of June 30, 2019, 146,000 RSUs have vested.

The weighted average fair value of RSUs granted during the three months and six months ended June 30, 2019 was CDN $1.50 per share. There were no RSUs granted during the three and six months ended June 30, 2018.

[e] Normal Course Issuer Bid ("NCIB")

On September 29, 2017, the Company received approval from the TSX regarding the notice filed by the Company to establish a normal course issuer bid ("NCIB") program to purchase, for cancellation, up to 500,000 common shares or approximately 2.4% of Intrinsyc's issued and outstanding common shares, as at September 21, 2017. The NCIB program commenced on October 4, 2017 and terminated on October 3, 2018.

11. SHARE CAPITAL (continued)

On September 27, 2018, the Company received approval from the TSX regarding the notice filed by the Company to extend its normal course issuer bid ("NCIB") program to purchase, for cancellation, up to 1,793,294 common shares or approximately 8.6% of Intrinsyc's issued and outstanding common shares, as at September 25, 2018. The NCIB program extension commenced on October 4, 2018 and will terminate on October 3, 2019, or on such earlier date as the Company may complete its purchases pursuant to a Notice of Intention filed with the TSX.

In connection with the NCIB program, the Company established an automatic repurchase plan (the "Plan") with its designated broker to allow for purchases of its common shares during certain pre-determined black-out periods, subject to certain parameters as to price and number of shares. Outside of these pre-determined black-out periods, common shares will be repurchased in accordance with management's discretion, subject to applicable law. Intrinsyc may vary, suspend or terminate the Plan only if it does not have material non-public information and the decision to vary, suspend or terminate the Plan is not taken during a pre-determined blackout period. The Plan constitutes an "automatic plan" for purposes of applicable Canadian securities legislation and has been reviewed by the TSX.

As a result of entering into the Plan, the Company has recorded a corresponding liability. As at June 30, 2019, the liability was up to a maximum of $519,843 (CDN$680,319) as compared to $659,566 (CDN $899,780) as at December 31, 2018 and $18,296 (CDN $22,952) as at January 1, 2018.

During three and six months ended June 30, 2019, the Company had purchased and cancelled 51,100 and 489,800 common shares for $51,225 (CDN $68,577) and $554,382 (CDN$ 739,638).

[f] Income (loss) per share

	Three months ended June 30, 2019	**Three months ended June 30, 2018**	**Six months ended June 30, 2019**	**Six months ended June 30, 2018**
Weighted average number of shares outstanding – basic	19,945,674	20,890,739	20,080,733	20,919,729
Dilutive effects of exercisable options	249,880	486,391	-	466,452
Weighted average number of shares outstanding – fully diluted	**20,195,554**	**21,377,130**	**20,080,733**	**21,386,181**

Due to the Company having a net loss for the six months ended June 30, 2019, there are no dilutive effects of exercisable options.

12. LEASES

Currently, the Company leases its Vancouver, BC facility (of approximately 12,000 square feet of office space) until October 31, 2022. In addition, it leased approximately 400 square feet until June 30, 2019 well as space of approximately 2,400 square feet until April 30, 2022 (both of these offices are in Taipei, Taiwan). The Company also rents office space in Bangalore, India on a month to month basis. Lease payments of the smaller Taiwan office, Indian office as well as variable operating costs of the long term leases are expensed (see Note 13 – Commitments and Contingencies). Below is a summary of the activity related to the Company's lease liabilities:

12. LEASES (continued)

	June 30, 2019	December 31, 2018	January 1, 2018
Maturity Analysis – contractual undiscounted cash flows			
Less than one year	$ 254,132	$ 167,382	$ 174,035
One to five years	1,554,113	1,434,490	1,741,947
Total undiscounted lease liabilities	**$1,808,245**	**$1,601,872**	**$1,915,982**
Lease liabilities included in Consolidated Statements of Financial Position	**$1,637,709**	**$1,424,179**	**$1,679,391**
Current	$ 214,353	$ 130,919	$ 130,674
Non-current	$1,423,356	$1,293,260	$1,548,717

Amounts Recognized in Statements of Operations	Three months ended June 30, 2019	Three months ended June 30, 2018	Six months ended June 30, 2019	Six months ended June 30, 2018
Finance charge on lease payments	$ 11,336	$10,641	$ 20,617	$21,718
Variable lease payments expensed	36,120	44,519	76,607	85,918
Short-term lease payments expensed	34,133	18,021	67,766	32,805
Total amounts recognized in Statements of Operations	**$81,589**	**$73,181**	**$164,990**	**$140,441**

Total lease payments made during the three and six months ended June 30, 2019 was $49,285 and $92,223 (three and six months ended June 30, 2018 - $41,888 and $84,560).

13. COMMITMENTS AND CONTINGENCIES

[a] The aggregate of minimum lease payments as at June 30, 2019 for the remainder of 2019 and subsequent years is as follows and reflect the payments of the variable operating costs of the long-term leases in Vancouver and Taiwan.

2019	$ 84,096
2020	168,192
2021	168,192
2022	136,575
	$ 557,055

[b] The Company warrants that its software and hardware products will operate substantially in conformity with product documentation and that the physical media will be free from defect. The specific terms and conditions of the warranties are generally ninety days. The Company accrues for known warranty issues if a loss is probable and can be reasonably estimated, and accrues for estimated incurred but unidentified warranty issues based on historical activity. To date, the Company has had no material warranty claims.

13. COMMITMENTS AND CONTINGENCIES (continued)

[c] The Company may be subject to a variety of claims and suits that arise from time to time in the ordinary course of business. Although management currently believes that resolving claims against the Company, individually or in aggregate, will not have a material adverse impact on the Company's financial position, results of operations, or cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future. To date, there are no claims or suits outstanding against the Company.

14. EXPORT DEVELOPMENT CANADA

On July 31, 2009, the Company entered into an agreement with EDC whereby EDC agreed to provide 90% insurance coverage for the Company's invoiced sales for a premium of between CDN$0.76 to CDN$1.41 per CDN$100 of monthly invoiced sales (certain customers are excluded from this coverage). The initial policy period was from July 1, 2009 to June 30, 2010 with an automatic yearly renewal unless the policy is terminated by the Company (the policy has been renewed until June 30, 2019). The maximum liability coverage at any one time is CDN$185,000 for domestic sales and CDN$7,000,000 for sales outside of Canada. As of June 30, 2019, 91% of trade receivables were covered by EDC insurance (December 31, 2018 - 85% and January 1, 2018 – 74%).

During the three and six months ended June 30, 2019, the Company recorded total premiums of $41,625 (CDN $55,683) and $93,368 (CDN $124,476) in sales and marketing as compared to total premiums of $51,866 (CDN $66,964) and $98,190 (CDN $125,550) for the three and six months ended June 30, 2018.

15. SEGMENTED INFORMATION

Operating segments

The Company currently has the following two operating segments:

1. Embedded Computing Hardware segment includes the sales of the Company's proprietary computer modules and development kits. The Company offers original equipment manufacturers ("OEMs") off-the-shelf and customized embedded computing modules; and

2. Services and Software segment includes turnkey product design and development services, as well as other engineering services and device software, including royalties. As well, it includes revenue generated from software products including: J-Integra® Enterprise Interoperability Software ("EIS"), and RapidRIL Telephony Software, including maintenance and support agreements for these products. These products and services are sold to OEMs, original device manufacturers ("ODMs"), technology providers, and other companies.

Corporate includes all operating expenses of the Company.

Information regarding the operations of each operating segment is included below. Performance is based on revenue less cost of sales.

A breakdown of revenues and cost of sales for each operating segment for the three and six months ended June 30, 2019 and June 30, 2018 is as follows:

15. SEGMENTED INFORMATION (continued)

Three months ended June 30, 2019	**Embedded Computing Hardware**	**Services and Software**	**Corporate**	**Total**

15. SEGMENTED INFORMATION (continued)

Geographic information

The Company's equipment is located as follows:

	June 30, 2019	December 31, 2018 (Restated – see Note 3)	January 1, 2018 (Restated – see Note 3)
Canada	$ 356,458	$ 387,864	$ 340,173
Taiwan	92,646	13,282	15,569
India	5,444	6,560	-
United States	-	-	6,959
Total	**$ 454,548**	**$ 407,706**	**$ 362,700**

The Company earned revenues attributed to the following geographic regions based on the location of the customer:

	Three Months ended June 30, 2019	Three Months ended June 30, 2018	Six Months ended June 30, 2019	Six Months ended June 30, 2018
United States	$ 3,774,993	$ 4,466,158	$ 7,677,329	$ 8,556,606
Asia Pacific	709,930	1,075,183	1,912,041	2,125,068
Europe	540,395	422,819	1,059,037	806,802
Canada	452,074	467,659	962,334	1,004,899
Other	764	-	1,626	867
	$ 5,478,156	**$ 6,431,819**	**$ 11,612,367**	**$ 12,494,242**

Significant customers

In each respective period, revenues from customers which amounted to 10% of more of the Company's revenues accounted for the following percentage of the Company's total revenues and accounts receivable, as indicated below:

	% Revenues for the Three Months ended June 30, 2019	% Revenues for the Six Months ended June 30, 2019	% of Accounts Receivable at June 30, 2019	% Revenues for the Three Months ended June 30, 2018	% Revenues for the Six Months ended June 30, 2018	% of Accounts Receivable at June 30, 2018
Customer 1	41%	39%	10%	34%	30%	38%

Receivables owing from Customer 1 are fully covered by EDC insurance in the event of payment default.

16. EXPENSES BY NATURE

Total salaries and wages as well as other personnel related expenses included in Cost of Sales and Expenses for the three and six months ended June 30, 2019 were $2,013,376 and $4,278,131 compared $1,992,099 and $4,011,073 during the three and six months ended June 30, 2018.

17. OTHER OPERATING EXPENSES

Other operating expenses consist of the following:

	Three months ended June 30, 2019	**Three months ended June 30, 2018 (Restated – see Note 3)**	**Six months ended June 30, 2019**	**Six months ended June 30, 2018 (Restated – see Note 3)**
Depreciation of equipment *(note 7)*	$ 25,694	$ 22,199	$ 51,336	$ 43,263
Amortization of intangible assets *(note 8)*	36,884	24,628	76,763	45,053
Amortization of right-of-use asset *(note 9)*	60,696	41,044	106,822	82,088
Share-based compensation – options *(note 10(c))*	55,857	87,733	104,953	150,287
Share-based compensation – RSUs *(note 10(d))*	37,710	47,525	64,704	99,229
	$ 216,841	**$ 223,129**	**$ 404,578**	**$ 343,638**

18. CAPITAL DISCLOSURES

The Company's objectives for managing capital are:

- To safeguard the Company's ability to continue as a going concern, so that it can provide adequate returns for shareholders and benefits for other stakeholders.

- To maintain a capital base so as to maintain investor, creditor, customer and market confidence.

The Company considers the items included in equity as capital. The Company manages the capital structure and makes adjustments to it (by either issuing new shares or buying back shares) in the light of changes in economic conditions and the risk characteristics of the underlying assets.

19. FINANCIAL INSTRUMENTS

[a] Financial assets and liabilities

Financial instruments are measured at amortized cost or fair value. Fair value represents the estimated amounts at which financial instruments could be exchanged between knowledgeable and willing parties in an arm's length transaction. Determining fair value requires management judgment. The following financial instruments are all measured at amortized cost. The fair value of each (with the exception of the investment in customer) approximates its carrying value due to their short-term nature. The fair value of the investment in customer is determined using

19. FINANCIAL INSTRUMENTS (continued)

implied valuations from financing rounds. Therefore, it is treated as a Level 1 financial asset with the fair value equating its carrying value.

The carrying values and fair values of financial assets (liabilities) are summarized as follows:

	June 30, 2019		December 31, 2018 (Restated)		January 1, 2018 (Restated)	
	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial Assets						
Cash and cash equivalents	$ 2,794,638	$ 2,794,638	$ 3,939,763	$ 3,939,763	$ 4,989,154	$ 4,989,154
Short-term investments	$ 1,022,488	$ 1,022,488	$ 2,027,579	$ 2,027,579	$ 2,260,089	$ 2,260,089
Trade and other receivables	$ 2,744,578	$ 2,744,578	$ 5,265,076	$ 5,265,076	$ 4,799,625	$ 4,799,625

Warrants	$ 30,000	$ 30,000	$ 30,000	$ 30,000	$ 153,000	$ 153,000
Financial Liabilities						
Trade and other payables	($3,111,480)	($3,111,480)	($5,415,376)	($5,415,376)	($4,938,065)	($4,938,065)
Lease liability – current	($ 214,353)	($ 214,353)	($ 130,919)	($ 130,919)	($ 130,674)	($ 130,674)
Lease liability	($1,423,356)	($1,423,356)	($1,293,261)	($1,293,261)	($1,548,717)	($1,548,717)

[b] Risk Management

Disclosures relating to exposure to risks, in particular credit risk, liquidity risk, foreign currency risk, and interest rate risk are provided below.

[i] Credit Risk

Credit risk is the risk of an unexpected loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's financial instruments that are exposed to concentrations of credit risk are primarily cash and cash equivalents, short-term investments and trade and other receivables. The Company limits its exposure to credit risk with respect to cash and cash equivalents by investing available cash, from time to time, in short-term deposits with Canadian financial institutions. With respect to trade and other receivables, the Company engages EDC to perform ongoing credit evaluations of Intrinsyc’s customers’ financial condition and requires letters of credit or other guarantees whenever deemed necessary.

Trade and other receivables were aged as follows:

19. FINANCIAL INSTRUMENTS (continued)

	June 30, 2019	December 31, 2018	January 1, 2018
Current	$ 2,414,630	$ 4,864,701	$ 3,913,053
31-60 days	23,629	173,195	94,977
Over 60 days	306,319	227,180	791,595
	$ 2,744,578	**$ 5,265,076**	**$ 4,799,625**

[ii] Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet liabilities when due. The contractual maturity of the majority of accounts payable is within one month.

Trade and other payables were aged as follows:

	June 30, 2019	December 31, 2018 (Restated – see Note 3)	January 1, 2018 (Restated – see Note 3)
Current	$ 2,391,000	$ 4,649,784	$ 4,234,247
31-60 days	619,585	755,946	401,523
Over 60 days	100,895	9,646	302,295
	$ 3,111,480	**$ 5,415,376**	**$ 4,938,065**

[iii] Foreign Currency Risk

Although substantially all of the Company’s revenues are received in U.S. dollars, the Company incurs operating costs primarily attributable to its services business and has outstanding trade and other payables denominated in Canadian dollars and other foreign currencies. Fluctuations in the exchange rates between these currencies could have a material effect on the business, financial condition and results of operations. The Company maintains certain assets, inclusive of a portion of its treasury investments, in Canadian dollars which are translated to its U.S. dollar functional currency resulting in an unrealized foreign exchange gain or loss. With all other variables remaining constant, assuming a 10% weakening of the Canadian dollar versus the U.S. dollar would have had the following impact on net loss as follows in the table below. An assumed 10% strengthening of the Canadian dollar versus the U.S. dollar would have had an equal but opposite effect on the amounts shown below:

19. FINANCIAL INSTRUMENTS (continued)

Source of net earnings/loss variability from changes in foreign exchange rates	**Three Months ended June 30, 2019**	**Three Months ended June 30, 2018 (Restated – see Note 3)**	**Six Months ended June 30, 2019**	**Six Months ended June 30, 2018 (Restated – see Note 3)**
Statement of Financial Position exposure	$ 41,255	($235,752)	$ 41,255	($235,752)
Net Cost of Sales/Operating Expenses (net exposure)	187,996	206,837	381,378	403,042
Net exposure	**$ 229,251**	**($ 28,915)**	**$ 422,633**	**($ 167,290)**

A 10% change in the New Taiwanese dollar to U.S. dollar exchange rate would have an approximate $2,000 impact on net income for the three and six months ended June 30, 2019 (three and six months ended June 30, 2018 – $3,000).

A 10% change in the rupee to U.S. dollar exchange rate would have no material impact on net income for the three and six months ended June 30, 2019 (three months ended June 30, 2018 - $nil).

[iv] Interest Rate Risk

The Company's exposure to interest rate fluctuations is primarily interest earned on its cash and cash equivalents as well as its short-term investments. During the three months ended June 30, 2019, the Company earned $18,666 of interest income on its cash and cash equivalents as well as its short-term investments. An increase or decrease of 100 basis points in the average interest rate earned during the period would have adjusted net earnings by approximately $40,000. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

20. RELATED PARTY TRANSACTIONS

Related parties include key management, the Board of Directors, close family members and enterprises which are controlled by these individuals as well as certain persons performing similar functions.

The remuneration of directors and key management of the Company for the three months and six months ended June 30, 2019 and 2018 are as follows:

	Three months ended June 30, 2019	**Three months ended June 30, 2018**	**Six months ended June 30, 2019**	**Six months ended June 30, 2018**
Short-term compensation	$ 306,866	$ 258,471	$ 924,689	$ 608,690
Share-based payments	$ -	$ -	$ 191,341	$ 103,716
	$ 306,866	**$ 258,471**	**$ 1,116,030**	**$ 712,106**

Short-term compensation for the six months ended June 30, 2019 included the Company's annual performance corporate bonus totalling an amount of $437,000 to its management, of which 75% was paid in cash with the remining 25% being paid out through the granting of 97,895 RSUs. The amount of $437,000 had been previously accrued for as operating expense during the year ended December 31, 2018.

20. RELATED PARTY TRANSACTIONS (continued)

Short-term compensation for the six months ended June 30, 2018 included the Company's annual performance corporate bonus totalling an amount of $90,000 which was paid in cash to its management during the three months ended March 31, 2018 which had been previously accrued for as operating expense during the year ended December 31, 2017.

There were no amounts owing to related parties as at June 30, 2019 and December 31, 2018.

The directors and key management were awarded 157,000 options under the Company's stock option plan during the six months ended June 30, 2019.

The directors and key management were awarded 185,000 stock options under the Company's stock option plan during the six months ended March 31, 2018. There were no RSUs granted during the six months ended June 30, 2018.

21. EMPLOYEE RETIREMENT SAVINGS CONTRIBUTIONS

	Three months ended June 30, 2019	Three months ended June 30, 2018	Six months ended June 30, 2019	Six months ended June 30, 2018
Benefit costs	$ 48,253	$ 46,799	$ 109,986	$ 103,651

The Company matches employees' retirement savings contributions to retirement plans as part of the employee benefits plan. Employees have the option of having the funds transferred to their individual retirement savings plans on a semi-monthly basis or on a periodic basis (most employees have the funds transferred on a semi-monthly basis).

INTRINSYC TECHNOLOGIES CORPORATION

Management's Discussion and Analysis of Financial Condition and Results of Operations

For the Three and Six Months Ended June 30, 2019

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis has been prepared by management as of August 12, 2019 and should be read in conjunction with the audited consolidated financial statements of Intrinsyc Technologies Corporation (the "Company" or "Intrinsyc") and related notes thereto for the year ended December 31, 2018 (prepared in accordance with International Financial Reporting Standards or "IFRS"). All amounts are presented in United States (U.S.) dollars unless otherwise noted. Additional information about the Company, including the Company's Annual Information Form ("AIF"), is available on SEDAR at www.sedar.com.

DISCLAIMER FOR FORWARD-LOOKING STATEMENTS

The following Management's Discussion and Analysis contains statements which, to the extent that they are not recitations of historical fact, may constitute forward-looking information under applicable Canadian securities legislation. Such forward-looking statements or information includes financial and other projections as well as statements regarding the Company's future plans, objectives, performance, revenues, growth, profits, operating expenses or the Company's underlying assumptions. The words "may", "would", "could", "will", "likely", "expect", "anticipate", "intend", "plan", "forecast", "project", "estimate" and "believe" or other similar words and phrases may identify forward-looking statements or information. Persons reading this Management's Discussion and Analysis are cautioned that such statements or information are only predictions, and that the Company's actual future results or performance may be materially different. Factors that could cause actual events or results to differ materially from those suggested by these forward-looking statements include, but are not limited to: the need to develop, integrate and deploy software solutions to meet its customers' requirements; the possibility of development or deployment difficulties or delays; the dependence on its customers' satisfaction; the timing of entering into significant contracts; its customers' continued commitment to the deployment of the Company's solutions; the risks involved in developing integrated software solutions and integrating them with third-party products and services; reliance on products manufactured by other companies for resale or distribution and reliance on third-party suppliers; the performance of the global economy and growth in software industry sales; market acceptance of the Company's products and services; customer and industry analyst perception of the Company and its technology vision and future prospects; the success of certain business combinations engaged in by the Company or by its competitors; possible disruptive effects of organizational or personnel changes; technological change; new products and standards; risks related to acquisitions and international expansion; reliance on large customers; concentration of sales; international operations and sales; management of growth and expansion; dependence upon key personnel and hiring; reliance on a limited number of suppliers; risks related to the Company's competition; the Company's not adequately protecting its intellectual property; risks related to product defects and product liability; currency exchange rate risk; and including, but not limited to, other factors described in the Company's reports filed on SEDAR, including its financial statements and management's discussion and analysis for the year ended December 31, 2018, and those referred to under the heading "Risk Factors". In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors: the Company's ability to execute on its business plan; the acceptance of the Company's products and services by its customers; the timing of execution of outstanding or potential customer contracts by the Company; the sales opportunities available to the Company; the Company's subjective assessment of the likelihood of success of a sales lead or opportunity; the Company's historic ability to generate sales leads or opportunities; and that sales will be completed at or above the Company's estimated margins. This list is not exhaustive of the factors that may affect the Company's forward-looking information. These and other factors should be considered carefully, and readers should not place undue reliance on such forward-looking information. All forward-looking statements made in this Management's Discussion and Analysis are qualified by this cautionary statement and there can be no assurance that actual results or developments anticipated by the Company will be realized. The Company disclaims any intention or obligation to update or revise

forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.

OVERVIEW

The Company was incorporated under the laws of Alberta on August 31, 1992 under the name I.T.C. Microcomponents Inc. and continued under the laws of British Columbia on July 19, 1995. The Company changed its name to Intrinsyc Software, Inc. on June 16, 1997. Articles of Continuance were filed under the Canada Business Corporations Act on May 1, 2003 to continue the Company federally and change the name of the Company from Intrinsyc Software, Inc. to Intrinsyc Software International, Inc. On June 17, 2014, the Company changed its name to Intrinsyc Technologies Corporation. The Company's principal business office is Suite 300, 885 Dunsmuir Street, Vancouver, British Columbia, V6C 1N5 and its registered office is Suite 1700, 1055 West Hastings Street, Vancouver, British Columbia, V6E 2E9. The Company is listed on the Toronto Stock Exchange ("TSX") under the trading symbol ITC.

The Company is a product developer and provides software, engineering services, and integrated solutions that enable high-performance Internet of Things products. Solutions span the development life cycle from concept to production and help device makers create compelling products with faster time-to-market.

CORPORATE SUMMARY

The Company provides solutions for the development and production of Internet of Things ("IoT") devices. The Company's embedded computing products include embedded development kits, vertical market reference designs and development platforms, mobile application development platforms, and production-ready embedded computers.

These products, combined with Intrinsyc's engineering services, help device makers and silicon vendors deliver IoT products with faster time-to-market, as well as improved innovation and quality. Additionally, the Company has legacy proprietary software that provides a bridge between Java and COM based computing platforms under the brand, J-Integra®.

The Company began selling its embedded computing modules based on Snapdragon technology from Qualcomm Technologies Inc., in 2013. Since that time, we expanded our client base with new design wins for these computing modules and they are now a substantial percentage of the Company's revenue.

The Company's business segments are described below.

Embedded Computing Hardware

The Embedded Computing Hardware segment includes the sales of the Company's proprietary computer modules, development kits, and related hardware technology.

- Production-ready embedded computing products include the Open-Q™ line of System on Modules ("SOM") and Single Board Computers ("SBC"); including the Open-Q™ 805, Open-Q™ 212A, Open-Q™ 410, Open-Q™ 820, Open-Q™ 835, Open-Q™ 835 µSOM, Open-Q™ 624A, Open-Q™ 626, Open-Q™ 2100 SOM, Open-Q™ 2500 SOM, Open-Q™ 600 SBC, Open-Q™ 660 µSOM, Open-Q™ 605 SBC, Open-Q™ 212A SOM and Home Hub Development Kit as well as the Open-Q™ 820Pro µSOM and Development Kit.

- The Open-Q™ family of products are based on Snapdragon™ technology from Qualcomm® Technologies Inc. The Company recently introduced the Open-X™ 8M SOM. The Open-X™ product line is based on i.MX processors from NXP Semiconductor, BV. The Company sells these solutions as production-ready computing products and also makes custom variants of these products that are tailored specifically to client requirements.

- Embedded hardware development kits (“HDK”) include the, Open-Q™ 805 HDK, DragonBoard 810™, Open-Q™ 820 HDK, Open-Q™ 2100, Open-Q™ 626 HDK, Open-Q™ 660 HDK, Open-Q 835 HDK, and Open-Q™ 845 HDK, Open-Q™ 670 HDK, and Snapdragon™ 855 HDK.

- Vertical market reference designs and development kits include the Snapdragon™ 820 Automotive Development Platform (“ADP”), Snapdragon™ Flight, Qualcomm Flight™ Pro reference platform, Open-Q™ 410 Wearable Computing Reference Design, and two that are targeted for smart home applications, the Open-Q™ 212A and Open-Q™ 624A development kits.

- In addition, the Company frequently designs, develops, and manufactures complementary peripheral boards that add additional functionality to Open-Q™ and Open-X SOMs and development kits.

The Company is building an expanding base of customers and prospects for the Open-Q™ and Open-X™ family of SOMs and custom embedded computing modules. Intrinsyc’s customers build a diverse set of intelligent connected products, including many new and exciting emerging categories such as: smart glasses and other wearable technology, robotics, digital signage, and more. As these customers increase sales of their products, Intrinsyc will benefit from repeat sales of our computing modules and/or design royalties. By working with a range of customers, from startups to well established entities, Intrinsyc can take advantage of the growth opportunities in these emerging device sectors, while limiting its exposure to any single new consumer or industrial product. The shared success business model being employed allows Intrinsyc to better align with our customers’ business and product initiatives, while enjoying the potential for greater revenue and margin upside. The Company’s revenue could vary significantly from one quarter to the next due to the timing of customer production requirements.

Intrinsyc’s computing modules are manufactured by two strategic manufacturing partners: one is based in North America to support quicker production lead times and smaller volume requirements, and the other based in China to support higher volume, lower cost, requirements. Computing modules are shipped to Intrinsyc or directly to the customer based on order size and customer requirements. Typically, larger volume orders would be shipped fully manufactured and tested from Intrinsyc’s contract manufacturer in China. The Company’s strategic manufacturing partners allow Intrinsyc to respond quickly to customer requirements and scale revenue without additional investment in facilities or personnel resources. Scaling revenue without a commensurate increase in operating expenses should allow the Company to generate greater profit growth.

Services and Software

The Company provides design and development services to silicon vendors, OEMs and ODMs building embedded and IoT devices. The Company’s capabilities in these areas are a product of over 20 years of embedded device development experience. As a result, the Company has developed core competencies in the areas of Board Support Package (“BSP”) and device driver development, power management, electrical, mechanical, and Radio Frequency (“RF”) design, testing and certification; all of which are complex and essential elements required to design and develop embedded and IoT devices.

The Company has cross platform capabilities on the key operating systems currently in the market for embedded and IoT devices: Microsoft Windows, QNX, Linux and Android operating systems.

The Company employs both a fixed fee pricing model and a time and materials pricing model for engineering services. Additionally, the Company may defer fees for product design or development services and collect fees in the form of per unit royalties.

Services and Software provided by the Company are as follows:

- Turnkey product development from concept through production, including development of product specifications, electrical, mechanical and RF design, BSP and driver development, and product test and certification services for OEMs developing embedded and IoT devices;

- Conducting feasibility studies, requirements analyses and architecture designs;
- Providing detailed technical training and support programs to OEMs;
- BSP and driver development;
- Electrical, Mechanical and RF Design;
- Field Programmable Gate Array ("FPGA") Design and Development;
- Camera Driver Development and Tuning;
- Power management services for OEMs designing small form factor products which are needed to improve battery life while simultaneously increasing applications and features that drive growth in power utilization;
- Embedded and IoT application development;
- RapidRIL™ Telephony Software and wireless integration services;
- J-Integra, a scalable, high-performance middleware solution for connecting Java directly to .NET, COM, and Exchange objects.

SIGNIFICANT EVENTS FOR THE SECOND QUARTER 2019

Financial Events

- Revenue decreased by 11% from the three months ended March 31, 2019 and by 15% from the three months ended June 30, 2018. The decrease over the comparable periods was due to decreased revenues in both of the Company's business segments.
- Expenses (excluding other operating expenses)[1] decreased by5% from the three months ended March 31, 2019 due primarily to decreased travel expenses and professional fees but was consistent compared to three months ended June 30, 2018.
- Net income for the three months ended June 30, 2019 was $66,247compared to net loss of $171,855 during the three months ended March 31, 2019 and net income of $108,989 for the three months ended June 30, 2018.
- Cash provided by operations was $85,283 during the three months ended June 30, 2019 compared to cash used in operations of $1,506,958 for the three months ended March 31, 2019 and cash provided by operations of $816,044 for the three months ended June 30, 2018.
- During the three months ended June 30, 2019 the Company had purchased and cancelled 51,100 common shares for CDN $68,577.

[1] Expenses (excluding other operating expenses) is a non-IFRS measure that does not have a standard meaning and may not be comparable to a similar measure disclosed by other issuers (it includes Sales and Marketing, Research and Development, and Administration expenses but excludes Other Operating Expenses). This measure does not have a comparable IFRS measure and is used by the Company to manage and evaluate its cash operating expenses.

- From April 30 – May 1, 2019, the Company's CEO and CFO presented and participated in one on one meetings at the Planet MicroCap Showcase 2019 in Las Vegas, Nevada.

- Announced the resignation of the Company's Vice President, Global Sales. Intrinsyc's CEO, Tracy Rees, is managing the sales organization until a replacement is hired.

Business Events

- Announced the receipt of orders that are in aggregate valued at US$921,011. Orders for the Company's Open-Q™ embedded computing modules are valued at US$411,200 and include an initial stocking order for a new client. The Company also received orders from existing and new clients for product development services valued at US$509,811. Products and services ordered are expected to be delivered over the next four months.

- On July 3, the Company announced the receipt of orders in the last week of June, valued at US$818,161. Orders for the Company's Open-Q™ embedded computing modules are valued at US$384,240 and include an initial stocking order for a new production client building medical devices. The Company also received orders from existing and new clients for product development services valued in aggregate at US$433,936.

- Announced the availability of the following products:

    - Snapdragon™ 855 Mobile Hardware Development Kit, a new mobile hardware development kit ("HDK")
    - Open-Q™ 212A system on module ("SOM") and Home Hub Development Kit
    - Open-Q™ 820Pro µSOM (micro System on Module) and Development Kit
    - Snapdragon 8155 Automotive Development Platform ("ADP")

- Increased design wins of companies developing their products or shipping commercial devices using the Company's computing modules, from 62 to 71. Clients shipping products powered by Intrinsyc's edge AI computing modules increased from 24 to 28, with 43 companies currently in development.

SELECTED QUARTERLY INFORMATION

The information in the tables below has been derived from the Company's unaudited interim condensed consolidated financial statements (excluding EBITDA[2]). The Company's quarterly operating results have varied substantially in the past and may vary substantially in the future. Accordingly, the information below is not necessarily indicative of results for any future quarter. Prior reported numbers have been restated to account for the impact of IFRS 15 and 16 (additional details on IFRS 15 and 16 are discussed in Critical Accounting Policies and Estimates section in this MD&A).

[2] EBITDA or Earnings before Interest, Taxes, Depreciation and Amortization is a non-IFRS measure that does not have a standardized meaning and may not be comparable to a similar measure disclosed by other issuers. EBITDA referenced here relates to operating income (loss) inclusive of revenue reclassified as interest income (as per IFRS) less other operating expenses. The closest comparable IFRS financial measure is Operating Income (Loss). This measure is used by the Company to manage and evaluate the cash operating income (loss) of the business.

FINANCIAL RESULTS FOR THE THREE MONTHS ENDED JUNE 30, 2019

The following analysis of the results of operations for the three months ended June 30, 2019 includes comparisons to the three months ended March 31, 2019 and June 30, 2018 (which has been restated to account for the impact of IFRS 16).

Revenue

The Company currently segregates revenue into two segments:

- Embedded Computing Hardware segment includes the sales of the Company's proprietary computer modules and development kits. The Company offers OEMs off-the-shelf and customized embedded computing modules.
- Services and Software segment includes turnkey product design and development services, as well as other engineering services and device software, including royalties. As well, it includes revenue generated from software products including: J-Integra® Enterprise Interoperability Software ("EIS"), and RapidRIL Telephony Software, including maintenance and support agreements for these products. These products and services are sold to OEMs, original device manufacturers ("ODMs"), technology providers, and other companies.

Revenue by Source	Three months ended June 30, 2019	%	Three months ended March 31, 2019	%	Three months ended June 30, 2018	%
Services and Software	$ 1,945,571	36%	$ 2,069.764	34%	$ 2,163,107	34%
Embedded Computing Hardware	3,532,585	64%	4.064.447	66%	4,268,712	66%
Total revenue	**$ 5,478,156**	**100%**	**$ 6.134.211**	**100%**	**$ 6,431,819**	**100%**

Revenue decreased by 11% from the three months ended March 30, 2019 and by 15% from the three months ended June 30, 2018. The decrease over the prior period was due to decreased revenues attributable to both of the Company's reporting business segments. The slight increase over the same period in the prior year was due to a slight increase in revenues attributable to both of the Company's reporting business segments.

Services and Software revenue was approximately $1.9 million during the three months ended June 30, 2019 as compared to approximately $2.1 million for the three months ended March 31, 2019 and approximately $2.2 million for the three months ended June 30, 2018. This decrease over the prior period was due to lower service revenue related to the development of customer products based on the Company's Embedded Computing products. The increase over the same period in the prior year was due to higher service revenue related to the development of customer products based on the Company's Embedded Computing products.

Total revenues attributable to the Company's Embedded Computing Hardware decreased by 13% during the three months ended June 30, 2019 compared to the three months ended March 31, 2019 and decreased by 17% compared to the three months ended June 30, 2018. The decrease over the comparable periods was due to decreased sales of Development Kits and embedded computing modules.

To date, the Company has had a significant portion of its revenue derived from its largest customer. In each respective period, revenues from customers which amounted to 10% or more of the Company's revenues accounted for the following percentages of the Company's total revenues:

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018
Revenue	$ 2,241,551	$2,311,438	$2,173,576
Percentage of total revenue	**41%**	**38%**	**34%**

There was one (1) customer that accounted for 41% of the total revenue for the three months ended June 30, 2019 as compared to one (1) customer that accounted for 38% of the total revenues for the three months ended March 31, 2019 and one (1) customer that accounted for 34% of the total revenues for the three months ended June 30, 2018.

The Company earned revenues attributed to the following geographical regions based on the location of the customer:

	Three months ended June 30, 2019	%	Three months ended March 31, 2019	%	Three months ended June 30, 2018	%
United States	$ 3,774,993	69%	$ 3,902,336	64%	$ 4,466,158	69%
Asia Pacific	709,930	13%	1,202,111	20%	1,075,183	17%
Europe	540,395	10%	518,642	8%	422,819	7%
Canada	452,074	8%	510,260	8%	467,659	7%
Other	764	<1%	862	<1%	-	-%
	$ 5,478,156	**100%**	**$ 6,134,211**	**100%**	**$ 6,431,819**	**100%**

The Company continues to generate the majority of its revenue from the United States market.

Gross Margin[3]

Gross margins vary by revenue segment, with aggregate gross margin being typically in the range of 35% to 55% for Services and Software segment and 15% to 25% for Embedded Computing segment. As a result, the overall gross margin is a blend of the margins attributable to each respective business segment.

	Three months ended June 30, 2019	%	Three months ended March 31, 2019	%	Three months ended June 30, 2018 (Restated)	%
Revenues	$ 5,478,156	100%	$ 6,134,211	100%	$ 6,431,819	100%
Cost of sales	3,613,965	66%	4,163,243	68%	4,246,582	66%
Gross margin	**$ 1,864,191**	**34%**	**$ 1,970,968**	**32%**	**$ 2,185,237**	**34%**

The Company's cost of sales includes Canadian and New Taiwan Dollar as well as Indian Rupee denominated costs which are translated into the Company's U.S. functional currency. Gross margin for the three months ended June 30, 2019 was 34%, which was higher than the 32% gross margin for the three months ended March 31, 2019 and consistent with the 34% gross margin for the three months ended June 30,2018.

Expenses

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Sales and marketing	$ 609,993	$ 601,986	$ 656,068
Research and development	330,747	427,005	376,371
Administration	754,022	786,418	661,406
Other operating expenses	216,841	187,737	223,129
Total expenses	**$ 1,911,603**	**$ 2,003,146**	**$ 1,916,974**
As a percentage of total revenue	**35%**	**33%**	**30%**

Expenses during the three months ended June 30, 2019 were slightly lower than the three months ended March 31, 2019. This was due to a decrease in commissions, travel, professional fees and marketing and promotion activities. Expenses during the three months ended June 30, 2019 were consistent with the three months ended June 30, 2018.

Sales and Marketing

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Sales and marketing	$ 609,993	$ 601,986	$ 656,068
As a percentage of total revenue	**11%**	**10%**	**10%**

The Company had a total of eleven (11) employees and independent sales agents in Sales and Marketing as at June 30, 2019 which is less than the twelve (12) employees and contractors as at June 30, 2018. Sales and marketing expense consists primarily of salaries and related personnel costs, sales commissions, consulting fees, trade show expenses, marketing collateral, advertising costs and facilities.

[3] Gross Margin is a non-IFRS measure that does not have a standard meaning and may not be comparable to a similar measure disclosed by other issuers. Gross Margin referenced here relates to revenues less cost of sales. This measure does not have a comparable IFRS measure and is used by the Company to manage and evaluate the operating performance of the Company.

The decrease in sales and marketing expense over the previous three months ended June 30, 2018 was due to a decrease in travel and marketing and promotional activities. The slight increase over the prior period was primarily due to increased employee related costs.

Research and Development

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Research and development	$ 330,747	$ 427,005	$ 376,371
As a percentage of total revenue	**6%**	**7%**	**6%**

Research and development expenses relate primarily to salaries and related benefit costs, and also include materials related to the development of the Company's embedded computing products. Research and development costs for the three months ended June 30, 2019 were lower than the prior periods due to decreased product development costs.

Administration

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Administration	$ 754,022	$ 786,418	$ 661,406
As a percentage of total revenue	**14%**	**13%**	**10%**

Administration expenses include executive and administrative staff, facilities, public company costs, insurance, corporate variable compensation accruals, accounting, legal and strategic consulting fees as well as various general administrative costs.

The increase over the period ended June 30, 2018 was primarily due to an increase in employee related costs (inclusive of an increase to the current year performance bonus) as well as an increase in professional fees. The decrease over the prior quarter was due primarily to a decrease in employee related costs and professional fees.

Other Operating Expenses

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Depreciation of equipment	$ 25,694	$ 25,642	$ 22,199
Amortization of intangible assets	36,884	39,879	24,628
Amortization of right-of-use asset	60,696	46,125	41,044
Share-based compensation	93,567	76,091	135,258
Total other operating expenses	**$ 216,841**	**$ 187,737**	**$ 223,129**

EBITDA

EBITDA was $169,429 for the three months ended June 30, 2019 compared to $155,559 for the three months ended March 31, 2019 and $491,392for the three months ended June 30, 2018.

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Operating income (loss)	($ 47,412)	($ 32,178)	$ 268,263
Add back: Other operating expenses	216,841	187,737	223,129
EBITDA	**$ 169,429**	**$ 155,559**	**$ 491,392**

Other Expenses (Earnings)

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Foreign exchange loss (gain)	$ 109,507	$ 67,703	$ 162,469
Interest and other expenses (income)	(239,075)	57,609	(10,726)
Total other expenses (earnings)	**($ 129,568)**	**$ 125,312**	**$ 151,743**

Other expenses for the three months ended June 30, 2019 were attributable to a foreign exchange loss of $109,507 offset by interest and other income of $239,075. Other expenses for the three months ended March 31, 2019 were attributable to a foreign exchange loss of $67,703, in addition to interest and other expenses of $57,609. Other expenses for the three months ended June 30, 2018 were attributable to a foreign exchange loss of $,162,469 offset by interest and other income of $10,726. The Company maintains certain assets, inclusive of a portion of its treasury investments, in Canadian dollars which are translated into its U.S. dollar functional currency which accounted for the majority of the foreign exchange loss reported above due to the weakening of the Canadian dollar as at June 30, 2019 over the prior periods.

Net Income (Loss)

	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Operating income (loss)	($ 47,712)	($ 32,178)	$ 268,263
Total other expenses (earnings)	(129,568)	125,312	151,743)
Income tax expense	15,909	14,365	7,531
Net income (loss)	**$ 66,247**	**($ 171,855)**	**$ 108,989**
Earnings (loss) per share (basic and fully diluted)	**$0.00**	**($0.01)**	**$0.00**

Net income for the three months ended June 30, 2019 was $66,247 or $0.00 earnings per share compared to net loss for the three months ended March 31, 2019 of $171,855 or $0.01 loss per share and to net income for the three months ended June 30, 2018 $108,989 or $0.00 earnings per share.

FINANCIAL RESULTS FOR THE SIX MONTHS ENDED JUNE 30, 2019

The following analysis of the results of operations for the six months ended June 30, 2019 includes comparisons to the six-month period ended June 30, 2018.

Revenue

Revenue by Source	Six months ended June 30, 2019	%	Six months ended June 30, 2018	%	Change
Services and Software	$ 4,015,335	35%	$ 4,174,471	33%	(4%)
Embedded Computing Hardware	7,597,032	65%	8,319,771	67%	(9%)
Total revenue	**$11,612,367**	**100%**	**$12,494,242**	**100%**	**(7%)**

The increase in revenue is attributable to increased revenues attributable to the Company's Embedded Computing business.

In each respective period, revenues from customers which amounted to 10% or more of the Company's revenues accounted for the following percentages of the Company's total revenues:

	Six months ended June 30, 2019	Six months ended June 30, 2018	Change
Revenue	$ 4,552,989	$3,781,632	20%
Percentage of total revenue	**39%**	**30%**	

During the six months ended June 30, 2019, one (1) customer accounted for 39% of the total revenue while one (1) customers accounted for 30% of the total revenue for the six months ended June 30, 2018.

The Company earned revenues attributed to the following geographical regions based on the location of the customer:

	Six months ended June 30, 2019	%	Six months ended June 30, 2018	%	Change
United States	$ 7,677,329	66%	$ 8,556,606	68%	(10%)
Asia Pacific	1,912,041	16%	2,125,068	17%	(10%)
Europe	1,059,037	9%	806,802	6%	31%
Canada	962,334	8%	1,004,899	8%	(4%)
Latin America	1,626	<1%	867	<1%	88%
Total revenue	**$ 11,612,367**	**100%**	**$ 12,494,242**	**100%**	**(7%)**

The Company generates the majority of its revenue from the United States market.

Gross Margin

Gross margins vary by revenue segment, with aggregate gross margin being typically in the range of 35% to 55% for Services and Software segment and 15% to 25% for Embedded Computing segment. As a result, the overall gross margin is a blend of the margins attributable to each respective business segment.

	Six months ended June 30,2019	%	Six months ended June 30, 2018 (Restated)	%	Change
Revenues	$11,612,367	100%	$12,494,242	100%	(7%)
Cost of sales	7,777,208	67%	8,321,192	67%	(7%)
Gross margin	**$3,835,159**	**33%**	**$4,173,050**	**33%**	**(8%)**

The gross margin percentage for the six months ended June 30, 2019 was consistent as compared to the six months ended June 30, 2018 due to a change in the revenue mix in which revenue from the Embedded Computing Hardware line of business increased resulting in a lower gross margin.

Expenses

	Six months ended June 30, 2019	Six months ended June 30, 2018 (Restated)	Change
Sales and marketing	$ 1,211,979	$ 1,296,374	(7%)
Research and development	757,752	773,093	(2%)
Administration	1,540,440	1,262,397	22%
Other operating expenses	404,578	419,920	(4%)
Total expenses	**$ 3,914,749**	**$ 3,751,784**	**4%**
As a percentage of total revenue	**34%**	**30%**	

The increase in total operating expenses was due primarily to an increase in sales and marketing expenses, employee related costs, professional fees and costs related to the development of new products.

Sales and Marketing

	Six months ended June 30, 2019	Six months ended June 30, 2018 (Restated)	Change
Sales and marketing	$ 1,211,979	$ 1,296,374	(7%)
As a percentage of total revenue	**10%**	**10%**	

Total sales and marketing expenses for six months ended June 30, 2019 decreased when compared to the six months ended June 30, 2018 due to a decrease in employee related costs, and travel and entertainment as well as advertising and promotion.

Research and Development

	Six months ended June 30, 2019	Six months ended June 30, 2018 (Restated)	Change
Research and development	$757,752	$773,093	(2%)
As a percentage of total revenue	**7%**	**6%**	

Research and development costs for the six months ended June 30, 2019 decreased over the six months ended June 30, 2018 due to lower employee related costs as a result of the decreased investment in the development of new products.

Administration

	Six months ended June 30, 2019	Six months ended June 30, 2018 (Restated)	Change
Administration	$1,296,374	$1,262,397	22%
As a percentage of total revenue	**11%**	**10%**	

Administration costs for the six months ended June 30, 2019 increased over the six months ended June 30, 2018 due to an increase in travel expense, employee related costs and professional fees. There was a reversal of a prior year accrued bonus which occurred in the comparable quarter.

Other Operating Expenses

	Six months ended June 30, 2019	**Six months ended June 30, 2018 (Restated)**	**Change**
Depreciation of equipment	$ 51,336	$ 43,263	19%
Amortization of intangible assets	76,763	45,053	70%
Amortization of right-of-use asset	106,822	82,088	30%
Share-based compensation	169,657	249,516	(32%)
Total other operating expenses	**$ 404,578**	**$ 419,920**	**(4%)**

EBITDA

EBITDA was $324,988 for the six months ended June 30, 2019 compared to $841,186 for the six months ended June 30, 2018.

	Six months ended June 30, 2019	**Six months ended June 30, 2018 (Restated)**
Operating income (loss)	($ 79,590)	$ 414,084
Add: revenue recognized as interest income as per IFRS	-	-
Add back: Other operating expenses	404,578	343,638
EBITDA	**$ 324,988**	**$ 841,186**

Other Expenses (Earnings)

	Six months ended June 30, 2019	**Six months ended June 30, 2018 (Restated)**
Foreign exchange loss (gain)	$ 177,210	$ 153,819
Interest and other expenses (income)	(181,466)	(31,354)
Total other expenses (earnings)	**($ 4,256)**	**$ 122,465**

Other earnings for the six months ended June 30, 2019 was attributable to a foreign exchange loss of $177,210 offset by interest and other income of $181,466. Other earnings for the six months ended June 30, 2018 was attributable to a foreign exchange loss of $153,819 offset by interest and other income of $31,354.

Net Income

	Six months ended June 30, 2019	Six months ended June 30, 2018 (Restated)
Operating income (loss)	($ 79,590)	$ 421,266
Total other expenses (earnings)	(4,256)	122,465
Income tax expense	30,274	30,246
Net income	**($ 105,608)**	**$ 268,555**
Earnings (loss) per share (basic and fully diluted)	**($0.00)**	**$0.01**

Net loss for the six months ended June 30, 2019 was $105,608 or $0.00 loss per share compared to net income for the six months ended June 30, 2018 which was $268,555 or $0.01 earnings per share.

LIQUIDITY AND CAPITAL RESOURCES

The Company's near-term cash requirements relate primarily to operations, working capital and general corporate purposes. Based on the current business plan, the Company believes cash and cash equivalents, along with its short-term investments will be sufficient to fund the Company's operating requirements for the next twelve months. The Company updates its forecasts on a regular basis and will consider additional financing sources as appropriate.

As at June 30, 2019, the Company had cash and cash equivalents totalling approximately $2.8 million and short-term investments totalling approximately $1.0 million with working capital[4] of approximately $10.0 million, as compared to cash and cash equivalents of approximately $3.9 million and short-term investments totalling approximately $2.0 million with working capital of approximately $10.3 million as at December 31, 2018.

Three Months ended June 30, 2019

Cash provided by (used in):	Three months ended June 30, 2019	Three months ended March 31, 2019	Three months ended June 30, 2018 (Restated)
Operating activities	$ 85,283	($ 1,506,958)	$ 816,044
Investing activities	(111,683)	943,938	(32,711)
Financing activities	(290,672)	(218,151)	(188,715)
Foreign exchange effect on cash and cash equivalents	(32,533)	(14,349)	10,238
Increase (decrease) in cash and cash equivalents	**($ 349,605)**	**($ 795,520)**	**$ 604,856**

Cash provided by (used in) operating activities for comparable periods was attributable to the Company's financial performance.

During the three months ended June 30, 2019, cash provided by investing activities was related to the purchase of short-term investments, equipment and intangible assets. During the three months ended March 31, 2019, cash provided by investing activities was related to the redemption of short-term investments offset by the purchase of equipment and intangible assets. During the three months ended June 30, 2018, cash used in investing activities was related to the redemption and subsequent repurchase of short-term investments offset by the purchase of equipment and intangible assets.

[4] Working Capital is a non-IFRS measure that does not have a standardized meaning and may not be comparable to a similar measure disclosed by other issuers. This measure does not have a comparable IFRS measure. Working capital as referenced herein is defined as current assets less current liabilities. The Company believes that the inclusion of this non-IFRS financial measure provides investors with an alternative presentation useful to investors' understanding of the Company's core operating results and trends.

Cash used in financing activities in all periods consisted of the exercise of employee stock options offset by the repurchase and cancellation of shares under the Company's Normal Course Issuer Bid ("NCIB") as well as principal lease payments.

Six Months ended June 30, 2019

Cash provided by (used in):	Six months ended June 30, 2018	Six months ended June 30, 2018 (Restated)
Operating activities	($ 1,421,675)	$ 818,349

Cash provided by (used in) operating activities for comparable periods was attributable the Company's financial performance.

Cash provided by investing activities during the six months ended June 30, 2019 was related to the redemption of short-term investments that had matured offset by the purchase of equipment and intangible assets. Cash provided by investing activities during the six months ended June 30, 2018 was related to the redemption and subsequent purchase of short-term investments that had matured offset by the purchase of equipment and intangible assets.

Cash used in financing activities in all periods of the exercise of employee stock options offset by the repurchase and cancellation of shares under the Company's Normal Course Issuer Bid ("NCIB") and principal lease payments.

STAFFING LEVELS

The following table summarizes the Company's headcount, consisting of employees and contractors, by functional group:

	As at June 30, 2019	As at March 31, 2019	As at June 30, 2018
Service engineers	25	28	43
Sales and marketing	11	11	12
Research and development	27	31	20
Administration	17	17	15
Total	**80**	**87**	**90**

Effort spent to develop new proprietary products was classified as research and development.

COMMITMENTS

The aggregate of minimum lease payments as at June 30, 2019 for the remainder of 2019 and subsequent years is as follows:

2019	$ 84,096
2020	168,192
2021	168,192
2022	136,575
	$ 557,055

Currently, the Company leases its Vancouver, BC facility (of approximately 12,000 square feet of office space) until October 31, 2022 as well as space of approximately 2,400 square feet until April 30, 2022 in Taipei, Taiwan. The above commitments reflect the payments of the long-term leases in Vancouver and Taiwan (See Note 3 of the Condensed Consolidated Financial Statements regarding accounting treatment of lease payments under IFRS 16).

ACCOUNTS RECEIVABLE INSURANCE

On July 31, 2009, the Company entered into an agreement with Export Development Canada ("EDC") whereby EDC agreed to provide 90% insurance coverage for the Company's invoiced sales for a premium of between CDN$0.76 to CDN$1.41 per CDN$100 of monthly invoiced sales (certain customers are excluded from this coverage). The initial policy period was from July 1, 2009 to June 30, 2010 with an automatic yearly renewal unless the policy is terminated by the Company (the policy has been renewed until June 30, 2019). The maximum liability coverage at any one time is CDN$185,000 for domestic sales and CDN$7,000,000 for sales outside of Canada. As of June 30, 2019, 91% of trade receivables were covered by EDC insurance (December 31, 2018 - 85% and January 1, 2018 – 74%).

During the three and six months ended June 30, 2019, the Company recorded total premiums of $41,625 (CDN $55,683) and $93,368 (CDN $124,476) in sales and marketing as compared to total premiums of $51,866 (CDN $66,964) and $98,190 (CDN $125,550) for the three and six months ended June 30, 2018.

TRANSACTIONS WITH RELATED PARTIES

Related parties include key management, the Board of Directors, close family members and enterprises which are controlled by these individuals as well as certain persons performing similar functions.

The remuneration of directors and key management of the Company for the three months and six months ended June 30, 2019 and 2018 are as follows:

	Three months ended June 30, 2019	Three months ended June 30, 2018	Six months ended June 30, 2019	Six months ended June 30, 2018
Short-term compensation	$ 306,866	$ 258,471	$ 924,689	$ 608,690
Share-based payments	$ -	$ -	$ 191,341	$ 103,716
	$ 306,866	**$ 258,471**	**$ 1,116,030**	**$ 712,106**

Short-term compensation for the six months ended June 30, 2019 included the Company's annual performance corporate bonus totalling an amount of $437,000 to its management, of which 75% was paid in cash with the remining 25% being paid out through the granting of 97,895 RSUs. The amount of $437,000 had been previously accrued for as operating expense during the year ended December 31, 2018.

Short-term compensation for the six months ended June 30, 2018 included the Company's annual performance corporate bonus totalling an amount of $90,000 which was paid in cash to its management during the three months ended March 31, 2018 which had been previously accrued for as operating expense during the year ended December 31, 2017.

There were no amounts owing to related parties as at June 30, 2019 and December 31, 2018.

The directors and key management were awarded 157,000 options under the Company's stock option plan during the six months ended June 30, 2019.

The directors and key management were awarded 185,000 stock options under the Company's stock option plan during the six months ended March 31, 2018. There were no RSUs granted during the six months ended June 30, 2018.

INVESTMENT IN CUSTOMER

On October 1, 2014, the Company announced that it invested in Stream TV Networks, Inc. ("Stream TV"), a current customer of Intrinsyc, an amount of $1,500,000 in the form of a subordinated, secured convertible promissory note bearing interest at three percent (3%) per annum with a maturity date of December 31, 2015 (the "Note"). Interest is payable on the earlier of (i) December 31, 2015 or (ii) when converted to Stream TV shares. Stream TV committed to acquire a minimum of $3,000,000 in Intrinsyc products and services over the next twelve months. This loan was classified as Loan to Customer.

The Note was initially convertible into the securities of Stream TV, at the sole option of Stream TV, subject to the execution of an equity financing of a minimum of $15 million by Stream TV (the "Qualified Financing"). The Note was convertible into the class of securities sold in the Qualifying Financing at the share price issued in the Qualifying Financing.

The Company had determined that a reasonable market interest rate for a loan with the features of the Stream TV convertible loan and for pre-commercial entities in the emerging technology sector would be 12%. The Company recognized the difference as a deferred discount.

On December 10, 2015, the Company announced that the arrangements were amended to increase the purchase commitment by Stream TV to $4,500,000 in Intrinsyc product, services and royalties to be generated on or before March 31, 2016, which Stream TV met. In addition, the subordinated, secured convertible promissory note was amended to remove the conversion feature and to extend the maturity date from December 31, 2015 to June 30, 2016.

On June 28, 2016, the Company announced that the arrangements were further amended, to increase the purchase commitment to $6,000,000 in Intrinsyc products, services and royalties to be generated on or before December 30, 2016, which Stream TV has met. In addition, the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from June 30, 2016 to December 30, 2016.

On December 29, 2016, the Company announced that the subordinated, secured promissory note, with a principal amount of $1.5 million, has been further amended to extend the maturity date from December 30, 2016 to March 30, 2017. In consideration for the extension, Intrinsyc received 30,000 warrants convertible into Class A common shares in Stream TV. at a strike price of $5 per share, on a 1 for 1 basis for a period of up to 5 years. The warrants may only be exercised if Stream TV becomes subject to a liquidity event defined in the warrant agreement as liquidation, dissolution, or winding up of Stream TV, whether voluntary or involuntary, or an Initial Public Offering ("IPO") or sale of Stream TV by either stock or assets that is at least a change of control transaction. To date, none of these warrants have been exercised.

On February 2, 2017, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from March 30, 2017 to February 1, 2018. In consideration for the extension, Intrinsyc received 120,000 warrants convertible into Class A common shares in Stream TV at a strike price of $5, on a 1 for 1 basis for a period of up to 5 years. The exercise of these warrants is also subject to the same terms as the warrants received on December 29, 2016. To date, none of these warrants have been exercised. In addition, Stream TV committed to acquire a minimum of $2,000,000 in Intrinsyc products, services, and royalties to be purchased or generated between February 1, 2017 and February 1, 2018 (which Stream TV has only committed to approximately $700,000).

On February 1, 2018, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, has been further amended to extend the maturity date from February 1, 2018 to April 2, 2018.

On April 2, 2018, the Company announced that the subordinated, secured promissory note, valued at $1.5 million, had been further amended to extend the maturity date from April 2, 2018 to May 2, 2018.

On May 2, 2018, the Company announced that it made a strategic equity investment in Stream TV Networks through the conversion of the subordinated, secured promissory note and interest accrued for a total amount of $1,661,384 into 415,346 common shares (which is less than 1% ownership in Stream TV). The amount was reclassified as Investment in Customer. In addition, the parties also signed an amendment to the Master Services Agreement in which Stream TV agreed to provide a commitment of $1,500,000 in services to be purchased directly or through connected party referrals during the eighteen (18) month period beginning May 1, 2018.

The Company revalued the investment as at December 31, 2018, with the decline in the fair value being recorded as Interest and Other Expenses (Income) in the Company's Statements of Operations for the year ended December 31, 2018. In the event that Stream TV does not raise a minimum of $25 million within the two-year period subsequent to the Equity Investment conversion date of May 2, 2018, the Equity Investment will revert back to become a Note Payable to Intrinsyc. In the event that Stream TV raises a minimum of $25 million within the two year period subsequent to the Equity Investment conversion date of May 2, 2018 at a lower valuation than the conversion of the Note into the Equity Investment by Intrinsyc on May 2, 2018 and Stream TV's two primary debtors also convert their loans into equity at this time, Stream TV will issue additional shares to Intrinsyc based upon lower valuation of the equity valuation completed by Stream TV.

The Company fair valued the Warrants using a modified Black Scholes calculation with the fair value on the date of inception being $30,000 as at December 31, 2018 and $153,000 as at December 31, 2017. The value of the Warrants was included in the Investment in Customer (formerly Loan to Customer) on the Statement of Financial Position with the decline in the fair value being recorded as Interest and Other Expenses (Income) on the Company's Statements of Operations for the year ended December 31, 2018.

The Company has assessed the investment for impairment at the end of the current reporting period and concluded that no loss event has occurred since the conversion of the Note to an equity investment in Stream TV. However, the Company acknowledges that there is uncertainty regarding the valuation of the equity investment due to the uncertainty inherent to the fact that Stream TV is a pre-commercial entity in an emerging technology sector. Further, the Company assessed that there was no revaluation of the investment and Warrants as at June 30, 2019.

SUBSEQUENT EVENTS

None.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

These consolidated financial statements of the Company, approved by the Board of Directors on May 13, 2019, have been prepared in accordance with International Financial Reporting Standards ("IFRS") and their interpretations adopted by the International Accounting Standards Board ("IASB").

Revenue Recognition

Revenue from contracts with customers, is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. To recognize revenue, a company would apply the following five steps:

- Identify the contract(s) with the customer.
- Identify the performance obligations in the contract(s).
- Determine the transaction price.
- Allocate the transaction price.
- Recognize revenue when a performance obligation is satisfied

The Company currently has two (2) business segments: Embedded Computing Hardware segment and Services and Software segment. The Company does not incur any costs to obtain a contract or costs to fulfil a contract that are eligible for capitalization.

Embedded Computing Hardware Segment

The Company sells embedded computing hardware (which includes both product development kits and production hardware products). Revenue is recognized when control of the hardware is transferred to the customer. This usually occurs when the hardware has been delivered to the customer. The transaction price is documented on the contract or purchase order and agreed to by the customer. Payment is either made before shipment is made or due at the time of shipment, as such a receivable is recognized as the consideration is unconditional (if payment is received after shipment). If payment received before shipment, advance payment is booked to deferred revenue and recognized once control of the hardware is transferred to the customer. Only the passage of time is required before payment is due (usually payment terms or Net 30-45 days).

The Company generally provides warranties for general repairs of defects that existed at the time of sale, as required by law, for production hardware products. As such, most warranties are assurance-type warranties which the Company continues to account for under IAS 37- Provisions, Contingent Liabilities and Contingent Assets..

Services and Software Segment

Services

The Company enters into contracts to provide services on the following basis:

- Time & Materials - services consist of revenues from software modification, consulting, implementation, training and integration services. These services are set forth separately in the contractual arrangements such that the total price of the customer arrangement is expected to vary depending on the actual time and materials incurred based on the customer's needs.

- Fixed Price - arrangements to render specific consulting and software modification services which tend to be more complex.

The Company will continue to recognize service revenue over time, using an input method to measure progress towards complete satisfaction of the service similar to the previous accounting policy, because the customer simultaneously receives and consumes the benefits provided by the Company. The Company uses labour hours expended which it believes is appropriate for the nature of the contract and the pattern of delivery of the performance obligation. The transaction price is documented on the contract or purchase order and agreed to by the customer. Payment is due at the time services are rendered and as such a receivable is recognized as the consideration is unconditional and only the passage of time is required before payment is due (usually payment terms or Net 30-60 days).

Software

The Company currently sells software licenses of its legacy software solution, enterprise interoperability software ("EIS") either on a perpetual basis or on a term-based basis as well as post contract customer support ("PCS"). It currently recognizes revenue from the sale of term-based or perpetual licenses at the time the software when control of the software has been transferred to customer. This usually occurs when the software licenses have been emailed to the customer. The transaction price is documented on the sales invoice and agreed to by the customer. Payment is generally due at the time of shipment, as such a receivable is recognized as the consideration is unconditional and only the passage of time is required before payment is due (payment terms are generally Net 30 days). Standalone selling price is observable in transactions without multiple performance obligations.

Post Contract Support ("PCS")

PCS revenue associated with software licenses is recognized rateably over the term of the PCS period, which typically is one year. Any unrecognized revenue is recorded in deferred revenue. PCS revenue includes software license updates that provide customers with rights to unspecified software product upgrades, maintenance releases and patches released during the term of the PCS period. Payment is generally due at the beginning of the contract period as such a receivable is recognized as the consideration is unconditional and only the passage of time is required before payment is due (payment terms are generally Net 30 days). Standalone selling price is observable in renewal transactions for PCS renewals and current standalone pricing for initial PCS contracts.

The Company's multiple-element sales arrangements include arrangements where software licenses and the associated post contract customer support ("PCS") are sold together. The total transaction price is allocated to each performance obligation on the basis of the relative stand-alone selling price of each distinct good or service with revenue being recognized based on the type of revenue (software license or PCS). Standalone selling price is observable in transactions without multiple performance obligations.

Impact of Previously Adopted Standards

The impact on the quarterly financial results as a result of adopting IFRS 15 – *Revenue from Contracts with Customers:*

New Standards Adopted in 2019

The Group applies, for the first time, IFRS 16 - *Leases* that require restatement of previous financial statements. The nature and effect of these changes are disclosed below.

Several other amendments and interpretations apply for the first time in 2019, but do not have an impact on the interim condensed consolidated financial statements of the Company

IFRS 16 - Leases

IFRS 16 – *Leases* supersedes the current IAS 17, Leases (IAS 17) standard. IFRS 16 introduces a single accounting model for lessees and for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee will be required to recognize a right-of-use asset, representing its right to use the underlying asset, and a lease liability, representing its obligation to make lease payments. The accounting treatment for lessors will remain largely the same as under IAS 17. The standard is effective for annual periods beginning on or after January 1, 2019. The Company has applied the full retrospective transition method. Additional information regarding the impact of the adoption of IFRS 16 (which the Company concluded is material) is presented in Note 3 of the interim condensed consolidated financial statements. The impact on the quarterly financial results are as follows:

Consolidated Statements of Financial Position

New Standards and Interpretations Not Yet Adopted

Standards issued but not yet effective up to the date of issuance of the Company's consolidated financial statements are listed below. This listing is of standards and interpretations issued, which the Company reasonably expects to be applicable at a future date. The Company is currently assessing the impact of the following standards on the consolidated financial statements and intends to adopt these standards when they become effective.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

Financial instruments are measured at amortized cost or fair value. Fair value represents the estimated amounts at which financial instruments could be exchanged between knowledgeable and willing parties in an arm's length transaction. Determining fair value requires management judgment. The following financial instruments are all measured at amortized cost. The fair value of each (with the exception of the investment in customer) approximates its carrying value due to their short-term nature. The fair value of the investment in customer is determined using implied valuations from financing rounds. Therefore, it is treated as a Level 1 financial asset with the fair value equating its carrying value.

The carrying values and fair values of financial assets (liabilities) are summarized as follows:

	June 30, 2019		December 31, 2018 (Restated)		January 1, 2018 (Restated)	
	Carrying Value	**Fair Value**	**Carrying Value**	**Fair Value**	**Carrying Value**	**Fair Value**

Lease liability	($1,423,356)	($1,423,356)	($1,293,261)	($1,293,261)	($1,548,717)	($1,548,717)

Disclosures relating to exposure to risks, in particular credit risk, liquidity risk, foreign currency risk, and interest rate risk are provided below.

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's financial instruments that are exposed to concentrations of credit risk are primarily cash and cash equivalents, short-term investments and trade and other receivables. The Company limits its exposure to credit risk with respect to cash and cash equivalents by investing available cash, from time to time, in short-term deposits with Canadian financial institutions and commercial paper with a rating not less than R1. With respect to trade and other receivables, the Company engages EDC to perform ongoing credit evaluations of Intrinsyc's customers' financial condition and requires letters of credit or other guarantees whenever deemed necessary.

Trade and other receivables were aged as follows:

	June 30, 2019	December 31, 2018	January 1, 2018
Current	$ 2,414,630	$ 4,864,701	$ 3,913,053
31-60 days	23,629	173,195	94,977
Over 60 days	306,319	227,180	791,595
	$ 2,744,578	**$ 5,265,076**	**$ 4,799,625**

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet liabilities when due. The contractual maturity of the majority of accounts payable is within one month.

Trade and other payables were aged as follows:

	June 30, 2019	December 21, 2018 (Restated	January 1, 2018 (Restated)
Current	$ 2,391,000	$ 4,649,784	$ 4,234,247
31-60 days	619,585	755,946	401,523
Over 60 days	100,895	9,646	302,295
	$ 3,111,480	**$ 5,415,376**	**$ 4,938,065**

Foreign Currency Risk

Although substantially all of the Company's revenues are received in U.S. dollars, the Company incurs operating costs primarily attributable to its services business and has outstanding trade and other payables denominated in Canadian dollars and other foreign currencies. Fluctuations in the exchange rates between these currencies could have a material effect on the business, financial condition and results of operations. The Company maintains certain assets, inclusive of a portion of its treasury investments, in Canadian dollars which are translated to its U.S. dollar functional currency resulting in an unrealized foreign exchange gain or loss. With all other variables remaining constant, assuming a 10% weakening of the Canadian dollar versus the U.S. dollar would have had the following impact on net loss as follows in the table below. An assumed 10% strengthening of the Canadian dollar versus the U.S. dollar would have had an equal but opposite effect on the amounts shown below:

Source of net earnings/loss variability from changes in foreign exchange rates	**Three Months ended June 30, 2019**	**Three Months ended June 30, 2018 (Restated – see Note 3)**	**Six Months ended June 30, 2019**	**Six Months ended June 30, 2018 (Restated – see Note 3)**
Statement of Financial Position exposure	$ 41,255	($235,752)	$ 41,255	($235,752)
Net Cost of Sales/Operating Expenses (net exposure)	187,996	206,837	381,378	403,042
Net exposure	**$ 229,251**	**($ 28,915)**	**$ 422,633**	**($ 167,290)**

A 10% change in the New Taiwanese dollar to U.S. dollar exchange rate would have an approximate $2,000 impact on net income for the three and six months ended June 30, 2019 (three and six months ended June 30, 2018 – $3,000).

A 10% change in the rupee to U.S. dollar exchange rate would have no material impact on net income for the three and six months ended June 30, 2019 (three months ended June 30, 2018 - $nil).

Interest Rate Risk

The Company's exposure to interest rate fluctuations is primarily interest earned on its cash and cash equivalents as well as its short-term investments. During the three months ended June 30, 2019, the Company earned $18,666 of interest income on its cash and cash equivalents as well as its short-term investments. An increase or decrease of 100 basis points in the average interest rate earned during the period would have adjusted net earnings by approximately $40,000. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

DISCLOSURE OF OUTSTANDING SHARE DATA

The Company is authorized to issue an unlimited number of common shares and an unlimited number of preference shares. As of August 12, 2019, the Company has 20,020,546 common shares issued and outstanding and no preference shares issued and outstanding.

The Company has instituted a rolling incentive stock option plan whereby shares reserved for issuance under the plan shall reflect the lesser of (i) 10% less 1 share of the issued and outstanding common shares of the Company from time to time; and (ii) 3,750,000 common shares. As of August 12, 2019, the Company is entitled to grant incentive stock options for 2,002,053 common shares under the Company's stock option plan, of which 1,443,671 have been granted.

The Company has adopted a restricted share unit plan (the "RSU Plan") which was approved by its shareholders on May 16, 2017. The aggregate maximum number of shares available for issuance from treasury under the RSU Plan shall not exceed 500,000 shares. The fair value of these equity-settled awards is recognized as compensation expense over the period that related services are rendered with a corresponding increase in equity. The total amount expensed is recognized over the vesting period on a tranche basis, which is the period over which all the specified vesting conditions should be satisfied. As of August 12, 2019, the Company has granted 316,895 RSUs.

On September 29, 2017, the Company received approval from the TSX regarding the notice filed by the Company to establish a normal course issuer bid ("NCIB") program to purchase, for cancellation, up to 500,000 common shares or approximately 2.4% of Intrinsyc's issued and outstanding common shares, as at September 21, 2017. The NCIB program commenced on October 4, 2017 and terminated on October 3, 2018 with 495,100 commons shares being purchased and cancelled by the Company.

On September 27, 2018, the Company received approval from the TSX regarding the notice filed by the Company to extend its NCIB program to purchase, for cancellation, up to 1,793,294 common shares or approximately 8.6% of Intrinsyc's issued and outstanding common shares, as at September 25, 2018. The NCIB program extension commenced on October 4, 2018 and will terminate on October 3, 2019, or on such earlier date as the Company may complete its purchases pursuant to a Notice of Intention filed with the TSX

In connection with the NCIB program, the Company established an automatic repurchase plan (the "Plan") with its designated broker to allow for purchases of its common shares during certain pre-determined black-out periods, subject to certain parameters as to price and number of shares. Outside of these pre-determined black-out periods, common shares will be repurchased in accordance with management's discretion, subject to applicable law. Intrinsyc may vary, suspend or terminate the Plan only if it does not have material non-public information and the decision to vary, suspend or terminate the Plan is not taken during a pre-determined blackout period. The Plan constitutes an "automatic plan" for purposes of applicable Canadian securities legislation and has been reviewed by the TSX.

As of August 12, 2019, the Company had purchased and cancelled 1,075,500 common shares under the NCIB extension.

RISKS AND UNCERTAINTIES

An investment in the securities of the Company may be regarded as speculative due to the Company's stage of development. Risk factors relating to the Company could materially affect the Company's future results and could cause them to differ materially from those described in forward-looking statements relating to the Company. Prospective investors should carefully consider these risks.

The following are some of the risks that are associated with the Company's business and operations and should be carefully considered by any potential investor in the Company's shares:

General Economic Conditions May Weaken

Global economic conditions are currently relatively positive. However economic conditions may weaken at some time in the future. The Company sells its products primarily in North America and is most keenly impacted by fluctuations in market conditions in this region. However, it also sells products to customers in more than 60 countries. Deteriorating economic conditions in Europe or Asia could negatively impact revenue and operating results.

Additional Financing

Even though the Company has been profitable since 2015, it has a history of operating losses and uses cash raised in equity markets to partially fund working capital. If adequate funds are not available when required or on acceptable terms, the Company may be required to delay, scale back or terminate its sales and marketing efforts, and may be unable to continue operations. There can be no assurance that the Company will be able to obtain the additional financial resources required to compete in its markets on favorable commercial terms or at all. Any equity offering may result in dilution to the ownership interests of shareholders and may result in dilution of the value of such interests.

Research and Development

The research and development activities of the Company may be funded by its customers through engineering services provided in addition to the Company's investment in research and development activities. If the Company fails to develop new products, incurs delays in developing new products, or if the product the Company develops are not successful, the Company's business could be harmed. Even if the Company does develop new products which are accepted by its target markets, the Company cannot assure that the revenue from these products will be sufficient to justify the Company's investment in research and development. The Company is highly dependent on a strategic partner and some customers to subsidize development of new products. There can be no assurance that its strategic partners or customers will continue to support the Company's product development initiatives.

Dependence on Suppliers

There are a limited number of suppliers, or in some cases, only one supplier, for some of the components that our contract manufacturers use in the Company's products, and any disruption or delay in supply could adversely impact its financial performance. Because its suppliers have other customers, they may not have sufficient capacity to meet all of the Company's needs during periods of excess demand. The recent global economic contraction has caused many of Intrinsyc's suppliers to reduce their manufacturing capacity. As the global economy improves, suppliers are experiencing and may continue to experience supply constraints until they expand capacity to meet increased levels of demand. These supply constraints may adversely affect the availability and lead times of components for Intrinsyc's products. Increased lead times mean that we may have to order materials earlier and in larger quantities. Further, supply constraints will likely result in increased expediting and overall procurement costs as the Company attempts to meet customer demand requirements. In addition, these supply constraints may affect the Company's ability, as well as our contract manufacturers' ability, to meet customer demand and thus result in missed sales opportunities and a loss of market share, negatively impacting revenue and the Company's overall operating results.

History of Losses

Even though the Company has been profitable since 2015, it has a history of operating losses, and there can be no assurance that the Company will be profitable in the future. As at June 30, 2019, the Company had an accumulated deficit of approximately $106.6 million. The Company's prospects must be considered in the context of the implementation stage of its current strategy, the risks and uncertainties it faces, and the inability of the Company to accurately predict its results of sales and marketing initiatives. There can be no assurances that implementation of the Company's strategy will result in the Company sustaining profitable operations.

Stock Price Volatility

The market price for the common shares of the Company fluctuates significantly, and these fluctuations tend to be exaggerated if the trading volume is low. The market price of the common shares may rise or fall in response to

announcements of technological or competitive developments, acquisitions or strategic alliances by the Company or its competitors, the gain or loss by the Company of significant orders or broad market fluctuations

Product Development and Technological Change

The market for the Company's products and services is characterized by rapidly changing technology, evolving industry standards and frequent new product introductions. To be successful, the Company will need to enhance existing products and to introduce new products and features in response to changing standards, customer requirements, and technological innovations by others.

The process of developing new products and solutions and enhancing existing products and solutions is complex, lengthy, costly and uncertain. If the Company fails to anticipate our customers' changing needs or emerging technological trends, its market share and results of operations could materially suffer. The Company must make long-term investments, develop or obtain appropriate know-how and intellectual property and commit significant resources before knowing whether its predictions will accurately reflect customer demand for its products and solutions. If the Company is unable to adapt its products to new technological industry standards, to extend its core technologies into new applications or new platforms or to anticipate or respond to technological changes, the market's acceptance of its products and solutions could decline and the Company's results could suffer. Additionally, any delay in the development, production, marketing or offering of a new product or application or an enhancement to an existing product or application could result in customer attrition or impede Intrinsyc's ability to attract new customers, causing a decline in the Company's revenue or earnings and weakening its competitive position.

Sales and Marketing and Strategic Alliances

The Company's strategic alliances with operating system vendors, semiconductor manufacturers, and independent software vendors are a key part of the Company's overall business strategy. The Company cannot, however, be certain that it will be successful in developing new strategic relationships or that the Company's strategic partners will view such relationships as significant to their own business or that they will continue their commitment to the Company in the future. The Company's business, results of operation, financial condition and stock price may be materially adversely affected if any strategic partner discontinues its relationship with the Company for any reason. Additionally, the Company at times relies on the voluntary efforts of its strategic partners rather than compliance with contractual obligations, and there are at times no minimum performance requirements. Therefore, the Company cannot be certain that these relationships will be successful.

Dependence on a Small Number of Customers

The Company's revenue is dependent, in large part, on significant contracts from a limited number of customers. During the three and six months ended June 30, 2019, 41% and 39% of the Company's consolidated revenue was attributable to its largest customer. Revenue derived from current and future large customers may continue to represent a significant portion of total revenue. The inability to continue to secure and maintain a sufficient number of large contracts would have a material adverse effect on the business, financial condition, operating results and cash flows of the Company. Moreover, the success of the Company will depend in part upon its ability to obtain orders from new customers, as well as the financial condition and success of its customers and general economic conditions.

Length of Sales Cycle

The typical sales cycle of the Company's products and services is lengthy and unpredictable, and involves significant investment decisions by prospective customers, as well as education of those customers regarding the use and the benefits of the Company's products and services. A design win, which is defined as tangible evidence of a client beginning the process of developing their product utilizing one of the Company's standard or custom computing modules, often takes between six and twelve months.

Not all new design wins lead to production, and even if they do, the timing of such production may not occur as the Company or its customers had estimated, or the volumes derived from such projects may not be as significant as the Company had estimated, which could have a substantial negative impact on its anticipated revenue and profitability.

The Company's product revenue expectations are highly dependent upon achieving successful design wins, moving those design wins to volume production as well as the market success of our customers' end products. The time between when the Company achieves a design win with a customer and when it begins shipping to that customer at production levels generally has been shortened with the Company's standards-based model. However, with many new design wins, customers require Intrinsyc to assist them with the design process. In addition, customers may require significant time to integrate Intrinsyc's products into their applications. The design process and the integration of customer specific applications can take six to eighteen months, and in some circumstances can take as long as 36 months. After that, there is an additional time lag from the start of production to achieving peak revenue. Not all design wins lead to production, and the Company may incur costs for designs that do not enter production. Even if a design win does lead to production, the volumes derived from such projects may be less than the Company had originally estimated. Customer projects related to design wins are sometimes canceled or delayed or can perform below original expectations, which can adversely impact anticipated revenue and profitability. In particular, the volumes and time to production associated with new design wins depend on the adoption rate of new technologies among end users. Program delays or cancellations could be more frequent during times of meaningful economic downturn.

Customer Credit Risk

Historically, the Company has offered very limited credit terms to our customers. As its customer base expands, as orders increase in size, the Company expects to offer increased credit terms and flexible payment programs to its customers. Doing so may subject the Company to increased credit risk, higher accounts receivable with longer days outstanding, and increases in charges or reserves, which could have a material adverse effect on its business, results of operations and financial condition.

Visibility of Future Customer Demand

The Company generally does not obtain firm, long-term purchase commitments from its customers, and frequently does not have visibility as to their future demand. Customers also cancel requirements, change engineering or other service requirements, change production quantities, delay production or revise their forecasts for future orders for a number of reasons that are beyond the Company's control. Cancellations, reductions or delays by a significant customer, or by a group of customers, could seriously harm the Company's operating results and negatively affect its working capital levels. Such cancellations, reductions or delays have occurred from time to time and may continue to occur.

Selling Price Erosion

Average selling prices of computing products typically are higher at the time of introduction of new products, which utilize the latest technology and tend to decrease over time as such products become commoditized and are ultimately replaced by even newer generation products. The Company cannot predict the timing or amount of any decline in the average selling prices of its products that it may experience in the future. In some instances, its agreements with distributors limit the ability to reduce prices unless it can make such price reductions available to them, or price protect their inventory. If the Company is unable to decrease per unit manufacturing costs faster than the rate at which average selling prices continue to decline, its business, financial condition and results of operations will be harmed.

Intellectual Property Protection

The Company's ability to compete may be affected by its ability to protect its intellectual property. It relies primarily on a combination of copyright, trademark, patent and trade secret laws, confidentiality procedures and contractual provisions to protect its intellectual property. While the Company believes that its products and technologies are adequately protected against infringement, there can be no assurance of effective protection. Monitoring and identifying unauthorized use of the Company's technology is difficult, and the prohibitive cost of litigation may impair the Company's ability to prosecute any infringement. The commercial success of the Company will also depend upon its products not infringing any intellectual property rights of others and upon no claims for infringement being made against the Company. The Company believes that it is not infringing any intellectual property rights of third parties, but there can be no assurance that such infringement will not occur. An infringement claim against the Company by

a third party, even if it is invalid, could have a material adverse effect on the Company because of the costs of defending against such a claim.

Competition

Because of intense market competition, the Company may not be able to grow or maintain current revenue to succeed. The Company faces competition in the design of embedded computing solutions from a number of sources globally, including its own customers, many of whom have the ability to design embedded computing solutions by utilizing their own internal resources. Intrinsyc could also lose market share if customers who currently outsource to Intrinsyc elect to in-source all or a portion of the design process in the future. The markets in which the Company operates are fragmented, with a few large, international companies competing both against each other and a large number of small and medium-sized companies that focus on a more select group of products and customers. Some of the current and potential competitors have a number of significant advantages over Intrinsyc, including:

- a longer operating history;
- greater name recognition and marketing power;
- preferred vendor status with our existing and potential customers;
- significantly greater financial, technical, personnel, sales and marketing and other resources, which allow them to respond more quickly to new or changing opportunities, technologies and customer requirements;
- broader product and services offerings to provide more complete solutions; and
- lower cost structures.

Consolidation among Intrinsyc's competitors could also result in the formation of larger competitors with greater market share and greater financial and technological resources than Intrinsyc and further increase competition in the markets it serves. Some of the Company's products are built upon processor technology acquired from Qualcomm Technologies, Inc. This technology is becoming more broadly available to Intrinsyc's competitors and there are an increasing number of competitive products being introduced to the market.

International Business Operations

The Company continues to operate internationally. International sales and the related infrastructure support operations carry certain risks and costs such as the administrative complexities and expenses of administering a business abroad; complications in both compliance with and also unexpected changes in regulatory requirements, foreign laws, international import and export legislation, trading policies, tariffs and other barriers; potentially adverse tax consequences; and uncertainties of law and enforcement relating to the protection of intellectual property and unauthorized duplication of software. There can be no assurance that these factors will not be experienced in the future by the Company or that they will not have a material adverse impact on the Company's business, results of operations and financial conditions.

Foreign Exchange Risk

Although substantially all of the Company's revenues are received in U.S. dollars, the Company incurs operating costs primarily attributable to its services business and has outstanding trade and other payables denominated in Canadian dollars and other foreign currencies. The Company attempts to mitigate this risk by denominating many of its payment obligations in U.S. dollars. The Company maintains certain assets, inclusive of a portion of its treasury investments, in Canadian dollars. Fluctuations in the exchange rates between these currencies could have a material effect on the business, financial condition and results of operations of the Company.

Insufficient, Excess or Obsolete Inventory

As a result of the Company's strategy to provide greater choice and customization of our products to its customers, it is required to maintain a high level of inventory of components. If the Company fails to maintain sufficient inventory, it may not be able to meet demand for its products on a timely basis, and sales may suffer. If the Company overestimates customer demand, the Company could experience excess inventory of its products and be unable to sell those products at a reasonable price, or at all. As a result, the Company may need to record higher inventory reserves.

In addition, from time to time the Company assumes greater inventory risk in connection with the purchase or manufacture of more specialized components in connection with higher volume sales opportunities. The Company expects that it will experience write-downs from time to time in the future related to existing and future commitments. If the Company is later able to sell inventory with respect to which it has taken a reserve at a profit, it may increase the quarterly variances in operating results. Historically, the Company has written off obsolete inventory. Excess or obsolete inventory levels for these or other reasons could result in unexpected expenses or increases in reserves against potential future charges which would adversely affect the Company's business and financial results.

Potential Fluctuations in Quarterly Results

The Company's quarterly operating results may vary significantly depending on factors such as the timing of new product introductions and changes in pricing policies by the Company and its competitors, market acceptance of new and enhanced versions of the Company's products and the timing of orders from its hardware customers. Because the Company's operating expenses are based on anticipated revenues and a high percentage of the Company's expenses are relatively fixed in the short term, variations in the timing of recognition of revenues can cause significant fluctuations in operating results from quarter to quarter and may result in unanticipated quarterly earnings shortfalls or losses. The Company may in the future experience lower profit margins as a result of an increased focus on a hardware-based business model to the extent that revenue from the sales of machine to machine and embedded computing modules may account for a greater percentage of the Company's revenues in future quarters. The market price of the Company's common shares may be highly volatile in response to such quarterly fluctuations.

Dependence on Key Personnel

The Company's future success depends largely on its ability to attract and retain talented employees. The Company is highly dependent on a limited number of key personnel to maintain customer and strategic relationships. Loss of key personnel could have an adverse effect on these relationships and negatively impact the Company's financial performance. The Company's future results of operations will depend in part on the ability of its officers, management and other key employees to implement and expand operational, customer support and financial control systems and to expand, train and manage its employee base. The Company's future performance will also depend to a significant extent on its ability to identify, attract, train and retain highly skilled sales, technical, marketing and management personnel. If the Company were to lose the services of any key personnel, the Company may encounter difficulties finding qualified replacement personnel.

Acquisitions

The Company has, and from time to time in the future may, acquire businesses, products or technologies that it believes complement or expand its existing business. Acquisitions of this type involve a number of risks, including the possibility that the operations of the acquired business will not be profitable or that the attention of the Company's management will be diverted from the day-to-day operation of its business. An unsuccessful acquisition could reduce the Company's margins or otherwise harm its financial condition. Any acquisition could result in a dilutive issuance of equity securities, the incurrence of debt and the loss of key employees. The Company cannot ensure that any acquisitions will be successfully completed or that, if one or more acquisitions are completed, the acquired businesses, products or technologies will generate sufficient revenues to offset the associated costs of the acquisitions or other adverse effects.

Product Liability

The Company's license agreements with its customers typically contain provisions designed to limit the Company's exposure to potential product liability claims. There can be no assurance that such provisions will protect the Company from such claims. The Company does not maintain product liability insurance. A successful product liability claim brought against the Company could have a material adverse effect upon the Company's business, results of operations and prospects.

Investment in Customer

The Company acknowledges that there is uncertainty regarding the valuation of the equity investment in Stream TV due to the uncertainty inherent to the fact that Stream TV is a pre-commercial entity in an emerging technology sector.

Shareholder Rights Plan

The Company has implemented a Shareholder Rights Plan (the "SRP"). The SRP provides for substantial dilution to an acquirer making a take-over bid for the common shares of the Company unless the bid meets the requirements described in the SRP. This could discourage a potential acquirer from making a take-over bid and make it more difficult for a third party to acquire control of the Company, even if such acquisition or bid would be beneficial to the Company's shareholders.

Management of Growth

The Company's future results of operations will depend in part on the ability of its officers and other key employees to implement and expand operational, customer support and financial control systems and to expand, train and manage its employee base. The Company's future performance will also depend to a significant extent on its ability to identify, attract, train and retain highly skilled sales, technical, marketing and management personnel. Substantial growth in the Company's hardware initiatives may require the Company to raise additional capital through the issuance of additional shares or securing financing. There can be no assurance that the Company would be able to secure additional funding through these activities.

INTERNAL CONTROL OVER FINANCIAL REPORTING AND DISCLOSURE CONTROLS

The Chief Executive Officer and Chief Financial Officer have designed disclosure controls and procedures to provide reasonable assurance that material information relating to the Company is made known to them by others within the Company. The Chief Executive Officer and Chief Financial Officer have also designed internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and preparation of the financial statements in accordance with IFRS.

The Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures and assessed the design of the Company's internal controls over financial reporting in accordance with *Internal Control - Integrated Framework 2013*, issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). This evaluation identified no instances in which internal controls did not operate in an effective manner. Nonetheless, the Company has further strengthened its internal control processes to mitigate future potential material financial statement misstatements and other internal control violations during the three months ended June 30, 2019.

Because of the inherent limitations in a control system, any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that it will prevent or detect all misstatements, due to error or fraud, from occurring in the financial statements. As the Company has a limited number of personnel, management has concluded that a weakness exists in the design of internal controls over financial reporting caused by a lack of adequate segregation of duties. This weakness has the potential to result in material misstatements in the Company's financial statements and should also be considered a weakness in its disclosure controls and procedures. Management has concluded that taking into account the present stage of the Company's development and the best interests of its shareholders; the Company does not have sufficient size and scale to warrant the hiring of additional personnel to correct this weakness at this time. To help mitigate the impact of this weakness and to ensure quality financial reporting, supervisory controls are exercised by management and the Audit Committee is vigilant in its' oversight.

The Chief Executive Officer and Chief Financial Officer of the Company conducted an evaluation of the disclosure controls and procedures as required by National Instrument 52-109, "Certification of Disclosure in Issuers' Annual and Interim Filings" issued by the Canadian Securities Administrators. They concluded that as at June 30, 2019, the

Company’s disclosure controls and procedures were effective to provide reasonable assurance that material information regarding required disclosures was made known to them on a timely basis.

FORM 52-109F2
CERTIFICATION OF INTERIM FILINGS

I, Tracy Rees, Chief Executive Officer of Intrinsyc Technologies Corporation certify the following:

1. ***Review:*** I have reviewed the interim financial report and interim MD&A (together, the "interim filings") of Intrinsyc Technologies Corporation (the "issuer") for the interim period ended June 30, 2019.

2. ***No misrepresentations:*** Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings.

3. ***Fair presentation:*** Based on my knowledge, having exercised reasonable diligence, the interim financial report together with the other financial information included in the interim filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

4. ***Responsibility:*** The issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as those terms are defined in National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*, for the issuer.

5. ***Design:*** Subject to the limitations, if any, described in paragraphs 5.2 and 5.3, the issuer's other certifying officer(s) and I have, as at the end of the period covered by the interim filings

a. designed DC&P, or caused it to be designed under our supervision, to provide reasonable assurance that

   i. material information relating to the issuer is made known to us by others, particularly during the period in which the interim filings are being prepared; and

   ii. information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

b. designed ICFR, or caused it to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

5.1 ***Control framework:*** The control framework the issuer's other certifying officer(s) and I used to design the issuer's ICFR is the COSO internal framework (Committee of Sponsoring Organizations of the Treadway Commission).

5.2 ***ICFR – material weakness relating to design:*** N/A

5.3 ***Limitation on scope of design:*** N/A.

6. ***Reporting changes in ICFR:*** The issuer has disclosed in its interim MD&A any change in the issuer's ICFR that occurred during the period beginning on April 1, 2019 and ended on June 30, 2019 that has materially affected, or is reasonably likely to materially affect, the issuer's ICFR.

FORM 52-109F2
CERTIFICATION OF INTERIM FILINGS

I, George Reznik, Chief Financial Officer of Intrinsyc Technologies Corporation certify the following:

1. ***Review:*** I have reviewed the interim financial report and interim MD&A (together, the "interim filings") of Intrinsyc Technologies Corporation (the "issuer") for the interim period ended June 30, 2019.

2. ***No misrepresentations:*** Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings.

3. ***Fair presentation:*** Based on my knowledge, having exercised reasonable diligence, the interim financial report together with the other financial information included in the interim filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

4. ***Responsibility:*** The issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as those terms are defined in National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*, for the issuer.

5. ***Design:*** Subject to the limitations, if any, described in paragraphs 5.2 and 5.3, the issuer's other certifying officer(s) and I have, as at the end of the period covered by the interim filings

a. designed DC&P, or caused it to be designed under our supervision, to provide reasonable assurance that

   i. material information relating to the issuer is made known to us by others, particularly during the period in which the interim filings are being prepared; and

   ii. information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

b. designed ICFR, or caused it to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

5.1 ***Control framework:*** The control framework the issuer's other certifying officer(s) and I used to design the issuer's ICFR is the COSO internal framework (Committee of Sponsoring Organizations of the Treadway Commission).

5.2 ***ICFR – material weakness relating to design:*** N/A

5.3 ***Limitation on scope of design:*** N/A.

6. ***Reporting changes in ICFR:*** The issuer has disclosed in its interim MD&A any change in the issuer's ICFR that occurred during the period beginning on April 1, 2019 and ended on June 30, 2019 that has materially affected, or is reasonably likely to materially affect, the issuer's ICFR.
